

## **Gleeson Constructors & Engineers to Showcase Food Processing Design-Build Expertise at 2026 IPPE**

Sioux City, Iowa – December 2025 – Gleeson Constructors & Engineers L.L.C., a leader in design-build solutions for food processing facilities, will exhibit at the 2026 International Production & Processing Expo (IPPE), the largest annual poultry, egg, and animal food industry event. Held from January 27-29, 2026, in Atlanta, Georgia, this premier event brings together over 1,300 exhibitors and thousands of decision-makers from across the globe.

At Booth #C37168, Gleeson will highlight its specialized design-build services for poultry and meat processing facilities. With more than 45 years of experience, Gleeson combines innovative design, precise execution, and a commitment to food safety to deliver tailored solutions that address the unique challenges of the food industry.

"IPPE is an incredible opportunity to connect with decision-makers and industry leaders who are shaping the future of food production," said Ron Rens, P.E., President of Gleeson Constructors. "We're excited to showcase how our design-build expertise can help businesses achieve their goals for efficiency, safety, and growth."

### **Stop by our booth and say "HELLO!"**

Stop by Booth #C37168 to meet the Gleeson team and learn more about how we deliver innovative, cost-effective solutions to enhance operations. For additional information, contact Ron Rens at [rrens@gleesonllc.com](mailto:rrens@gleesonllc.com).
