

NUQO[®] Unveils XPR[®] Approach: Precision in Protection for Next-Gen Feed Additives at IPPE.

Atlanta, USA – January 26–29, 2026 / NUQO[®] Feed Additives invites industry professionals to IPPE 2026 to explore its **XPR[®] technology** (eXtra Protection & Release) approach—a revolutionary standard in feed additive manufacturing.

XPR[®] combines high protection, targeted release, and user-friendly design to transform fragile active molecules into resilient, high-performance solutions. Through advanced technologies like micro-encapsulation, double encapsulation, and tailored granulation, NUQO[®] ensures stability, efficacy, and ease of use from the feed mill to the animal's gut.

At Booth A2663, Hall A, discover how XPR[®] redefines precision in animal nutrition. Connect with our experts to explore customized solutions for palatability, gut health, and pathogen control, and learn how our Swiss-engineered innovations deliver measurable impact.

Join us at IPPE 2026 to experience the future of feed additives. For meetings or inquiries, contact info@nuqo.eu.

About NUQO Feed Additives NUQO[®] is a leading provider of **sustainable, high-performance feed additives**, committed to advancing animal nutrition, food safety, and environmental responsibility through innovative technologies.
