## **PRESS RELEASE**

---

### **NEW PRO 12 AVIARY**

*Hellmann Poultry to showcase brand-new aviary system*

Hellmann Poultry Equipment will present its latest innovation, the PRO 12 aviary system, at IPPE 2026. Designed for outstanding egg quality, smooth bird flow, and exceptionally easy management, the PRO 12 sets a new benchmark for compact, high performance aviaries.

With an overall height of just 6'–6.7", the PRO 12 is one of the lowest systems on the market, giving farm staff an unparalleled overview of the flock—no climbing required. Its fully closed egg channel prevents hens from accessing freshly laid eggs, ensuring a significantly higher number of clean, uncracked eggs at the cross conveyor.

The PRO 12 features a durable tilting floor nest, slim divided manure belts for minimal maintenance, and a robust, long lasting design. All essentials—feed, water, and nest—are located within just 11 sq ft, keeping bird movement calm and efficient while supporting welfare oriented management.

A combination of middle and center egg belts effectively reduces system eggs, and the uniform layout of all rows and tiers helps minimize KBD. Integrated crossovers promote even bird distribution throughout the system.

To accommodate varied barn dimensions, the PRO 12 offers multiple configuration options and can be configured with 2,3 or 4 intermediate floors.

Engineered for durability, performance, and ease of use, the PRO 12 delivers a modern, practical solution for today's cage free egg producers.

Visit Hellmann Poultry Equipment at booth B37055 during IPPE 2026 to experience the PRO 12 aviary firsthand, or reach out to us at [sales@hellmannpoultry.de](mailto:sales@hellmannpoultry.de)

*PRO 12 laying aviary: compact dimensions for exceptionally easy management.*

Hellmann Poultry offers a wide range of products Made in Germany for modern egg production including alternative cage-free aviary systems for pullets and layers as well as traditional, enrichable and fully enriched housing systems for rearing and laying that can also be equipped with egg elevator or egg lift collection systems.

Our flexible design concepts with multiple tier heights and depths to choose from and the close cooperation between sales, engineering and production allow us to produce custom-made solutions tailored to the individual requirements of each egg producer.

Hellmann Poultry was established in 1968 by German engineer Willi Hellmann. The company is based in northern Germany and has recently expanded its premises with a brand-new office building and state-of-the-art production facilities.

Through a worldwide distributor network, Hellmann provides reliable service and support to our customers. For more information on Hellmann Poultry GmbH, visit us at [www.hellmannpoultry.com](http://www.hellmannpoultry.com)
