

## PRESS RELEASE

# ANDRITZ marks 50 years at IPPE and introduces new era of customer support

**MUNCY, PA. JANUARY 2026**, ANDRITZ will celebrate 50 years of innovation and partnership at the International Production & Processing Expo (IPPE), Booth A1525. For half a century, ANDRITZ has worked alongside feed producers to deliver solutions that drive efficiency, reliability, and sustainability. This milestone underscores the company's ongoing commitment to helping customers succeed in an evolving industry.

As part of this commitment, ANDRITZ is making a strategic investment in customer success with the launch of a new die manufacturing plant in Windsor, Ontario. This investment strengthens ANDRITZ's position as a trusted partner in the feed industry and ensures faster delivery, continued responsiveness, and long-term support for customers. By improving supply reliability and reducing lead times across North America, ANDRITZ helps feed producers minimize downtime and maintain a competitive edge.

ANDRITZ provides a full range of services for both ANDRITZ equipment and other brands, including after-sales support, engineered spare and wear parts, maintenance and repairs, process optimization and operator training. This integrated approach ensures customers receive maximum value from their investment and benefit from reliable performance and continuous innovation.

The investment in North America reflects a long-term commitment to being closer to customers and understanding their unique challenges. By expanding local manufacturing and service capabilities, ANDRITZ creates a stronger regional presence that enables faster response times, personalized support and solutions tailored to the North American feed market.

As the feed industry faces growing demands for efficiency and sustainability, ANDRITZ remains focused on innovation and partnership. Through advanced process solutions, automation and digitalization tools and expanded service capabilities, ANDRITZ helps customers meet challenges head-on.

"This milestone is about more than celebrating the past. It is about investing in the future," said Dan Lundt, Vice President of North America for ANDRITZ Feed & Biofuel. "Our new Windsor die plant and expanded service capabilities demonstrate our commitment to being closer to customers and delivering the reliability and responsiveness they need to succeed."

**ANDRITZ is proud to debut its new tagline at IPPE: ALWAYS ON. ALWAYS AHEAD.**

More than a campaign line, it is a mindset that reflects the company's promise of reliability that never stops and innovation that never slows. It applies across service, technology, and is enduring, flexible, and global.
