

THE DISTYNCT DIFFERENCE.

PROTECT

The Distynct Smart Alarm installs in under an hour using your old alarm system's existing wires and probes. There's no need to buy expensive new probes. Let's use what you've got!

PREDICT

Identify problems before they happen with the Distynct dashboard. Save time by viewing your barn's information all in one convenient location from your phone. Use this to identify issues and predict animal health outcomes.

PROGRESS

The Distynct Connectivity Engine enables fully remote smart alarms. Alarm visibility and management from your phone means no more driving to the site for false alarms or to edit alarm parameters.
