PRESS RELEASE

Optimizing Poultry Production With Digital Farming Tools

An Integrated Data Solution That Provides Real-Time Insights For Informed Decision-Making

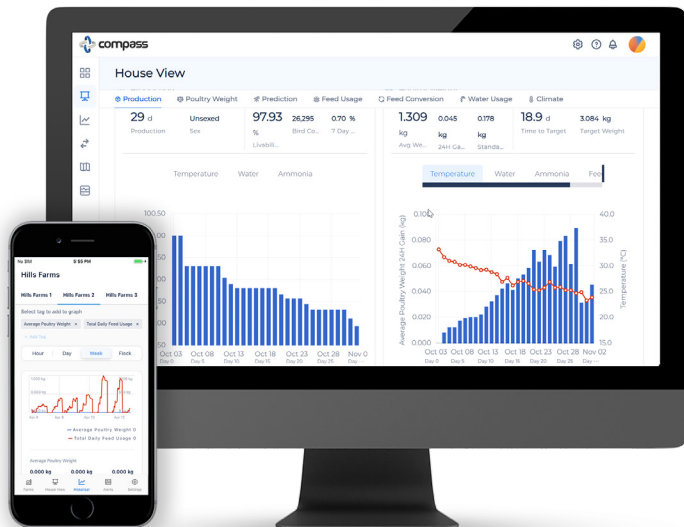

Inteliala's solution integrates poultry-specific sensors, remote Data Management Software and data-driven predictive models. Combined, these tools provide a powerful decision-making system that helps poultry growers succeed and improve profitability by applying best practices consistently.

IoT & Sensors

Data Integration Platform

AI Solutions

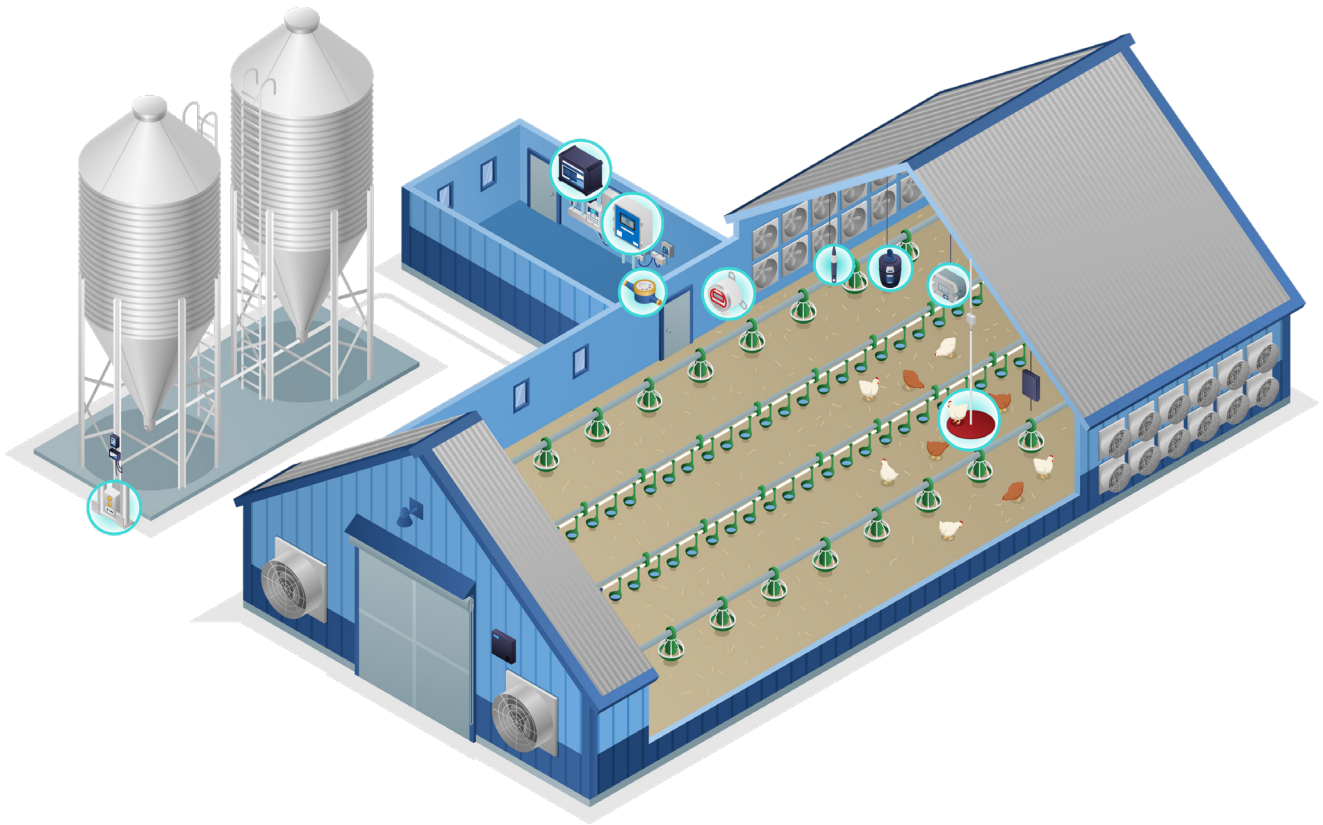

Management Software

A Flexible Package Adapted to Your Organization's Needs

Even if you already use the services of another company, you can choose to combine them with those of Inteliala, or opt for an all-Inteliala package.

By adopting a collaborative approach to data acquisition, we ensure that data is effectively used, regardless of its location. This approach empowers customers with flexible and always-relevant solutions that can adapt and evolve alongside their growth.

Providing IoT and Smart Sensors on The Farm

We offer an extensive selection of wireless and wired sensors and are continuously working to expand our range of compatible options.

Intelia's data collection solutions rely on essential livestock specific sensors, which play a crucial role by efficiently capturing vital data required for comprehensive analysis. The collected data is then processed and analyzed using Intelia's powerful analytics platform, Compass, to provide producers with valuable insights and actionable information.

- Feed Management
- Bird Weight Management
- Water Management
- Static Pressure
- Humidity, CO, CO₂ & Ammonia Monitoring
- Controllers
- Gateways
