Quality Technology International Remains A Leader In Natural Products

Antibiotic-free animal health and nutrition products are becoming a standard on poultry farms due to bird health, retailer preference, and consumer demand.

At IPPE 2021, QTI launched new proprietary strains of natural DFM pre- and pro-biotic products designed to help producers of conventional, antibiotic-free and organic poultry, swine and cattle to improve production performance and food safety.

Today, QTI delivers an ever-expanding product line as the exclusive U.S. distributor of Nor-Feed botanical products, as well as a powerful ADDCON acidifier, providing U.S. producers with even more natural and effective tools for improved animal nutrition and health.

QTI Brands & Products

- Q-Biotic® Series: direct-fed microbial for improving gut health
- MCM: mannanase-hydrolyzed copra meal patented for decreasing salmonella
- BacPack®: probiotic and prebiotic combination reducing food safety threats
- Refresh™ : water soluble supplement providing electrolytes and other key nutrients for supporting intestinal health during stress periods

Nor-Feed-Sourced Products for U.S. Producers

- Nor-Grape® 80: polyphenol vitamin E replacement product working against oxidative stress
- Norponin® XO: all natural coccidia mitigation product
- Nor-Spice AB®: citroflavonoids for enhancing animal digestion and performance
- Durelax®: natural calming product for animals
- Nor-Mite®: In-feed aromatic insect repellent

ADDCON-Sourced For U.S. Producers

- FORMI® NDF: patented acidifier for hygiene and efficiency with strong anti-microbial effect

History of Leadership

“For more than 25 years, Quality Technology International has been a leader in developing natural products, well ahead of other companies,” says QTI President and CEO Troy Lohrmann. “We are proud to have decades of the research and development commitment that gave QTI a significant head-start in this important field of natural animal health and nutrition.”

The QTI Q-Biotic® Series contains selected proprietary Bacillus strains, with products providing single-strain and multi-strain versions. These lines were selected for the challenging production requirements needed to address animal health and sustainability, while providing the users with increased return on investment.

NEWS RELEASE

“Customers report significant results with our Q-Biotic® products,” says Joey Coor, QTI sales manager, North America. “Better performance such as improved feed efficiency, weight gain, and shell quality - at greater return-on-investment - is always welcome in poultry production.”

Research and Testing

QTI is unique in the degree of technical support it provides via staff microbiologists, nutritionists and veterinarians, including its Q-Intestinal Integrity Monitoring Services, “Q-IIMS™” lab services designed to assess the health status of customer livestock. QTI also provides services to help enhance food safety and improve egg and meat quality.

“Our proprietary portfolio has been developed and verified through this new research and testing laboratory, with products having been evaluated by multiple independent research centers,” according to CEO Lohrmann.

About Quality Technology International

For more than 25 years, QTI has been a leader in providing natural gut health products for conventional, organic, or ABF production. For more information, contact Quality Technology International at 847-649-9300, or info2@qtitech.com
