FOR IMMEDIATE RELEASE – 1/22/2026

Double L Group Launches DX Vertical Fan to Enhance Air Circulation and Energy Efficiency in Poultry Facilities

Double L Group, a leading innovator in poultry ventilation solutions, proudly announces the launch of its new DX Vertical Fan, engineered to deliver optimal air circulation and improved energy efficiency for modern poultry facilities. Designed to mix large volumes of air effectively, the DX Vertical Fan helps create a more uniform environment year-round while reducing overall energy demands.

The DX Vertical Fan is specifically designed to improve airflow distribution throughout the poultry house. During colder months, it helps maintain consistent warmth from floor to ceiling, reducing the need for excess heat output and lowering energy costs. With durable construction and a maintenance-free direct drive motor, this fan provides reliable performance in demanding environments.

Key Features

- **Efficient Air Mixing Design:** Circulates and blends large volumes of air to promote uniform temperatures and improved air quality throughout the poultry house, resulting in significant energy savings.
- **Maintenance-Free Direct Drive Motor:** Eliminates belts and routine maintenance, reducing downtime and long-term operational costs.
- **Corrosion-Resistant Construction:** Built with durable, corrosion-resistant materials to ensure long-lasting performance in harsh agricultural environments.
- **Adjustable Air Distribution:** Offers wide coverage with adjustable airflow patterns to meet the specific needs of each facility.
- **Easy Ceiling Mount Installation:** Designed for simple ceiling mounting using chain links, allowing for flexible placement and quick installation.
- **Variable Speed Control Option:** Available with variable speed control for customized airflow and performance optimization.

“The DX Vertical Fan reflects our commitment to developing solutions that improve efficiency, reduce energy consumption, and support long-term facility performance,” said Trinity Persful, CEO and President of Double L Group. “This product helps producers maintain consistent conditions while lowering operational costs, making it a valuable addition to any poultry operation.”
