

## Safeguard delicate eggs with Prinzen machines

Eersel, December 5, 2025 - There's nothing more precious than a freshly laid egg. This egg needs to be handled with the utmost care to ensure it remains first-class from start to finish. With the Prinzen solutions you're sure about optimal quality and minimal risk. This results in benefits for both eggs and farmers: automated egg handling safeguards top-quality eggs while reducing costs and increasing profitability.

### Efficiency is key, regardless of the amount of egg production

Simplicity, compact and safety: these are the key words that you need in your egg room. When you combine careful handling with speed, the egg collection process becomes an easier task. Collecting table eggs quick and easy is possible at any size farm, thanks to the variety of capacities.

### Egg transport: a safe egg flow

An egg's journey from the nest to the packing station is challenging, making transport across egg collection belts crucial. Efficient egg collection requires optimal egg flow while maintaining quality.

### Vencobelt

The solution to further automate the egg collection process and connect multiple poultry houses. It combines careful egg handling, high transport capacities and fits in every egg room.

### Key features

- Unique plastic carriers - careful egg handling
- Flexible design - fits in every egg room
- Open structure - easy to clean and less contamination
- Standardized egg transitions (from egg belts) - maximum crack free eggs

### Egg packers: careful yet fast egg handling

Regardless the size of the farm and the amount of eggs produced - Prinzen puts safety, efficiency and excellence first. Table egg packers can even be extended for further automation of the egg collection process, such as infeed belts, egg coders, tray stackers and automatic pallet loaders.

#### Prinzen 50-70-100

Prinzen packers are designed to provide the highest egg quality throughout the process.

|             |                  |
|-------------|------------------|
| Prinzen 50  | 18,000 eggs/hour |
| Prinzen 70  | 25,200 eggs/hour |
| Prinzen 100 | 36,000 eggs/hour |

#### Key features

- Reduces manual labour
- Gentle egg handling
- Easy operation

#### Speedpack

Handling and packing eggs quickly yet carefully on 30 cell trays. The packer consists of only three transfer points which ensures optimum egg handling.

#### Key features

- Safe egg treatment
- Easy in operation
- Quick and careful egg packing

### Reducing labour - improve your daily egg collection work

You can significantly reduce manual labour and further automate the daily egg collection process. The Palletiser 110 and Pallet Loader efficiently handle stacks of trays onto pallets, improving employee efficiency and ergonomics while reducing labour and saving time.

#### Palletiser 110

Greatly reducing the tiring work of handling stacks of trays, and pleasantly improves the daily egg collection work. Operating independently, it connects with any suitable type of farm packer.

#### Key features

- Automatic storage for 20 dividers
- Reduce collection time and labour
- Improve employee efficiency and ergonomics

### **Precision poultry farming - objectivity and consistency are key**

Depending only on pairs of eyes to select consistently and effectively every day is nearly impossible. The Meggsius Select does the visual inspection in an absolutely objective and consistent way. It's a machine consisting of multiple cameras and a sorting unit. The criteria-based algorithm is set by the operator: to his own requirements and according to the flock's age. Quality control by the Meggsius Select is defined by the egg's size and shape, various kinds of dirt, and various grades of shell damage. Multiple pictures are taken from all sides of each egg to avoid missing out on any abnormality on the eggshell.

### **Meggsius Select**

Safeguarding objective and consistent grading and sorting of eggs. A fully automated process reducing dependency on labour.

### **Key features**

- Automated process - less labour
- Objective and consistent grading & sorting
- Award-winning innovation
