XTech Invites IPPE 2027 Attendees to “Choose the Who” in Manufacturing Facility Engineering

Visit XTech at Booth B45045 to meet the experienced team behind manufacturing facility projects

ATLANTA, Georgia – XTech, an engineering firm focused on manufacturing facilities, will exhibit at IPPE 2027 in **Booth B45045**, January 26–27. The team will be on hand to talk with attendees about a question that often gets overlooked when hiring an engineering firm: who will actually be doing the work?

“In engineering, you don’t get what you pay for. You get who you pay for,” said **Dustin Anhalt, Partner** at XTech. “A firm can have 100 people on staff, but headcount doesn’t necessarily equate to expertise. When the project is a manufacturing facility, the details that matter aren’t in a proposal. They come from having been there, many times over.”

XTech’s team brings more than **150 years of combined experience in manufacturing**. These are the engineers and designers who show up on client projects, bringing the practical knowledge that comes from working inside manufacturing facilities again and again.

Questions to ask before hiring an engineering firm

- Who will actually be doing the work on my project?
- How much manufacturing experience do they bring?
- Have they solved problems like mine before?

“The price tells you what a firm charges. The people tell you what you’ll get,” said Anhalt. “Choose the who.”

IPPE 2027 attendees are invited to stop by Booth B45045 to meet the XTech team and discuss upcoming facility projects.

About XTech

XTech is an engineering firm focused on manufacturing facilities. With 150+ years of combined manufacturing experience across its team, XTech puts experienced people on every project. Learn more at xtechdesigngroup.com.
