

Eurofins Expands Third-Party Grain Railcar Inspection Network

Dayton, OH - Eurofins Grain Inspection, a leading provider of third-party commodity inspections, is excited to announce the expansion of its on-site railcar inspection and testing services. This strategic expansion reinforces Eurofins' commitment to delivering agile solutions to local elevators, co-ops, and mills, ensuring uncompromised service and swift turnaround time for end-users.

Eurofins Grain Inspection currently operates at over 30 locations across the Midwest, specializing in corn, soybeans, and wheat facilities. This expansion allows for a comprehensive range of on-demand tests including, mycotoxins, falling number, NIR, non-GMO, and specialty crop evaluations. The dedicated team of rail inspectors is ready to serve any domestic elevator within 24 hours, leveraging industry-leading technology and a gateway to Eurofins' extensive global network.

“We’re thrilled to offer a competitive solution for originators and end users that goes beyond providing necessary commodity grades and testing”, Jessica Coco, General Manager at Eurofins Grain Inspection & Sampling. “We’re innovating the service model itself to set new standards for service, dependability, and turnaround time to alleviate demanding harvest and logistical pressures.”

Since 1977, Eurofins Grain Inspection has been the trusted third-party grain inspector for numerous processors, elevators, and rail locations throughout the United States. Adhering to Federal Grain Inspection Services (FGIS) guidelines, ensures the highest level of accuracy and quality standards for all buyers and sellers. With decades of industry experience, Eurofins anticipates customer needs, develops innovative solutions, and serves as an industry expert for all clients.
