

IPPE 2024: Petersime's broad range of intelligent hatchery solutions on display

From a full range of incubator solutions to a unique cloud-based hatchery software, the Petersime technology ecosystem gives hatchery owners all the 'tools' they need to boost productivity, minimize costs and maximize profitability.

With over a century of incubator innovation, Petersime is uniquely positioned to address the wide range of customer needs on the rapidly evolving pathway to hatchery optimization and digitalization. At IPPE 2024, visitors will learn about the solutions Petersime has on offer to help maximize hatchery performance and profitability:

- ▶ **Eagle Trax™**, the first intelligent hatchery software that enables hatcheries to digitize, analyse and optimally use data to advance ever more in hatchery efficiency, productivity and chick quality.
- ▶ **X-Streamer™**, Petersime's intelligent single-stage incubator that knows which eggs are on board and uses this knowledge to guide hatchery managers to make the best incubation decisions, while making working procedures for hatchery operators simple and error-free.

Visitors of the IPPE 2024 show can find the Petersime booth in **Hall B, N° 4045**

About Petersime

[Petersime](#) provides world-leading incubators, hatchery equipment and turnkey hatcheries aligned with the expertise and support to maximize return on investment. For over 100 years, Petersime's mission has been to use nature as a reference to continue perfecting the incubation process and help customers reach maximum performance. Additionally, Petersime leads the way in the optimization of the poultry value chain through the use of big data. Headquartered in Belgium and with Regional Centres on strategic locations, Petersime's incubators, hatchery solutions and services are available worldwide.
