INCUBATION SYSTEMS TO DEBUT RISK WATCH™ EARLY WARNING SYSTEM AND REVOLUTIONARY HATCHERY SOLUTIONS AT IPPE 2026

New predictive maintenance technology catches problems before alarms to protect hatchery operations

HERRIN, IL – December 1, 2025 – Incubation Systems, Inc., a leading provider of commercial incubation equipment and services, will showcase its groundbreaking Risk Watch™ Early Warning System alongside innovative hatchery solutions at the International Production & Processing Expo (IPPE) 2026, January 27-29 at the Georgia World Congress Center in Atlanta, Georgia. **Visit Booth #B39027** to discover how their technology is transforming hatchery operations worldwide.

With over 20 years of expertise serving more than 100 hatcheries across 50+ countries, Incubation Systems specializes in precision-engineered incubation systems, control upgrades, and custom solutions for the poultry industry. The company manufactures and stocks over 2,000 incubation equipment parts, supporting major brands including Chick Master, Petersime, Smith, Cumberland, and ISI machines.

Featured Innovations at IPPE 2026:

- **NEW Risk Watch™ Early Warning System** – Revolutionary predictive maintenance technology that continuously monitors all setters and hatcher units in real-time, identifying performance trends BEFORE bird quality or hatchability are affected
- **ProCal Wireless Calibration Kit** – Next-generation wireless calibrator with interchangeable probes and simultaneous charging capabilities for maximum efficiency
- **Crush-Resistant Handle Buggies** – Enhanced safety equipment featuring stainless steel roller bearings that eliminate hand injury risks
- **Egg Data Logger** – Complete farm-to-hatchery monitoring system tracking temperature, humidity, and shock data throughout transport
- **Champion Pressure Controller** – Advanced room/plenum pressure control with Fusion Hatchery Management System integration

"Our new Risk Watch™ system represents a paradigm shift in hatchery management," said Thomas Cull, President of Incubation Systems, Inc. "By catching problems before alarms and protecting hatches before it's too late, we're giving our customers a true competitive advantage. This predictive approach minimizes risk, reduces downtime, and ensures consistent chick performance."

The Risk Watch™ system monitors key parameters including heating, cooling, humidity, damper position, and warm-up time, providing targeted maintenance alerts that allow staff to investigate specific machines before problems escalate.

Visit Booth #B39027 to:

- Experience live demonstrations of the Risk Watch™ Early Warning System
- See the wireless ProCal calibration system in action
- Test our crush-resistant safety handles
- Explore our complete range of hatchery solutions
- Discuss custom engineering for your specific needs

About Incubation Systems, Inc.

Founded in 2001, Incubation Systems, Inc. provides incubation equipment services, parts, and custom engineering to poultry hatcheries worldwide. The company is dedicated to advancing hatchery and environmental control technology through precision-engineered systems designed to maximize productivity and sustainability.
