

FOR IMMEDIATE RELEASE

Walinga Inc. Highlights Advanced Feed Transportation Equipment and Pneumatic Conveying Solutions at IPPE 2026

Guelph, ON – January 2026 – Walinga Inc., a trusted manufacturer of bulk material handling and feed transportation equipment for more than 70 years, will showcase several key innovations at the 2026 International Production & Processing Expo (IPPE) in Atlanta. Attendees can visit Booth A2417 to explore Walinga’s latest advancements engineered for efficiency, reliability, and performance across feed, milling, and grain handling operations.

This year, Walinga will feature:

- **Leading-edge Feed Transportation Equipment** – Built for dependable, high-capacity movement of feed with industry-proven durability, tailored to customer specific needs.
- **Walinga Hydraulic Cooling Packages “Wet Kits”** – Updated cooling technology designed to extend component life, improve system stability, and optimize performance across demanding workloads.
- **Central-Vac Systems for Feed Mill Cleanup** – High-efficiency solutions that help facilities improve sanitation, dust control, and worker safety.
- **The Walinga 3510 Agri-Vac** – A versatile, powerful grain handling unit known for its mobility, durability, and exceptional ease of operation.

“IPPE provides a great opportunity to connect with producers and processors who depend on reliable equipment every day,” said a Walinga spokesperson. “We’re excited to highlight new capabilities that help our customers increase uptime and improve overall efficiency.”
