## **FV Group Showcases Plastifloor® MMA Flooring Systems at IPPE 2026, Delivering Rapid Installation Across Extreme Temperatures**

**Royse City, TX — January 17, 2026** — FV Group, a national leader in industrial resinous flooring installation and distribution, will exhibit at the **International Production & Processing Expo (IPPE) 2026**, showcasing the performance advantages of **Plastifloor® MMA (Methyl Methacrylate) flooring systems** for food, poultry, meat, and protein processing facilities.

At IPPE 2026, FV Group will highlight how Plastifloor MMA systems help processors **reduce downtime, maintain sanitation standards, and extend floor life**, even in the most demanding environments. A key advantage of Plastifloor MMA is its ability to be installed across an **exceptional temperature range—from -20°F to 110°F**—making it ideal for freezers, coolers, hot processing areas, and active production facilities.

“Processing facilities operate in extreme conditions and cannot afford extended shutdowns,” said **Gammy Figueroa, Manager of FV Group**. “Plastifloor MMA systems allow us to install seamless, durable, and hygienic floors quickly—even in subzero environments—while returning facilities to service in hours instead of days.”

Plastifloor MMA flooring systems offer:

- **Installation temperature range from -20°F to 110°F**
- **Rapid cure and same-day return to service**
- **Seamless, hygienic surfaces** suitable for USDA and FDA-regulated facilities
- **Excellent resistance to chemicals, impact, and thermal shock**
- **Proven performance in cold storage, processing, and washdown areas**

In addition to product demonstrations, FV Group will host **live booth training sessions** at IPPE 2026, providing attendees with practical insight into MMA flooring performance, system selection, and real-world installation considerations.

### **Booth Training Schedule – Booth B39077**

- **January 27, 2026 at 1:00 PM and 2:30 PM**
- **January 28, 2026 at 1:00 PM**
- **January 29, 2026 at 9:00 AM**

233 County Road 911

“These sessions are designed for facility managers, engineers, contractors and anyone who want actionable knowledge—not just product literature,” added Figueroa. “We’re sharing what actually works in active processing environments.”

IPPE attendees are invited to visit **FV Group at Booth B39077** to learn more about Plastifloor MMA flooring systems and attend scheduled training sessions.

## About FV Group

FV Group is a specialized industrial flooring contractor and distributor with decades of experience in **resinous, MMA, epoxy, and urethane cement flooring systems**. Serving food processing, cold storage, and industrial facilities nationwide, FV Group delivers high-performance flooring solutions focused on speed, durability, and long-term value.
