FOR IMMEDIATE RELEASE

## Wexler Packaging Products to Exhibit Full Range of Sustainable Packaging Solutions at IPPE 2026

**December 2025:** Wexler Packaging Products is gearing up for another strong year at the International Production & Processing Expo (IPPE), returning to Atlanta, Ga., Jan. 27–29 with a 600-square-foot booth showcasing the latest in sustainable banding, linerless labeling and food inspection technologies. Exhibiting in Booth C-19127, we'll highlight our three core solution areas with live equipment demonstrations designed to help processors improve efficiency, reduce waste and modernize their operations.

IPPE continues to be the world's largest annual event for the poultry, meat, egg and animal food industries, and the 2026 show is set to be its biggest yet. With more than 651,000 square feet of exhibit space and over 1,250 confirmed exhibitors, attendees can expect to see cutting-edge innovations across the entire protein production and processing supply chain. As a long-time exhibitor, Wexler Packaging Products is proud to contribute to this growing platform of technology, resources and knowledge sharing.

For products that need a secure bundle or a clean label (or both!), we'll be demonstrating ATS-Tanner banding solutions, including the US-2100 IBL-CB-R automated banding system capable of processing 3" or 4" material, along with the standalone US-2100 stainless steel bander. These systems continue to gain traction across protein packaging environments for their ability to reduce materials, streamline labeling, and support high-volume production with consistent, secure banding.

Also on display will be the latest linerless labeling innovations from Ravenwood Packaging. Wexler is bringing both the Nobac 5000 and the Nobac 5000V, the new version engineered specifically for whole birds and larger poultry applications. The Nobac 5000 will be paired with a VXR system to demonstrate a full linerless labeling and vision inspection workflow, showcasing how processors can maximize sustainability while maintaining accuracy and branding flexibility.

"Our team is excited to return to IPPE with a strong lineup of equipment," said Ryan Perlman, Wexler Packaging Products. "This show continues to be a key opportunity for us to connect with protein processors, demonstrate how our solutions address real production challenges, and discuss how waste reduction and automation can be achieved in today's fast-moving market."

IPPE attendees will have access to over 80 hours of educational sessions, activities and networking opportunities throughout the week. The event is sponsored by the American Feed Industry Association, the Meat Institute and the U.S. Poultry & Egg Association and attracts professionals from more than 120 countries. Registration is now open and you can register for no cost using our VIP Pass or enter code EX21218 when registering.

Wexler Packaging Products invites IPPE attendees to stop by Booth C-19127 to meet the team, see live demonstrations and explore sustainable alternatives for labeling, inspection, branding and bundling in food production environments.
