FOR IMMEDIATE RELEASE

Chief Agri Introduces Innovative Belt Conveyor Solutions for Superior Handling and Maintenance Efficiency

Kearney, NE - Chief Agri, a leading provider of innovative grain handling solutions, is pleased to announce the launch of its advanced product line of Belt Conveyors, featuring the Chief Commercial Enclosed Belt (CCEB) and Chief Spool Enclosed Belt (CSEB). These cutting-edge conveyors are designed to revolutionize the handling of commodities with a focus on maximizing capacity, operational efficiency, and ease of maintenance.

Belt Conveyors: Gentle Handling, Unmatched Versatility

Chief Agri's Belt Conveyors stand out as the ideal choice for gentle handling of any commodity. These conveyors are customizable in terms of length and capacity, offering unparalleled versatility to meet the unique requirements of various applications. One of the standout advantages of Chief Agri's Belt Conveyors is their lower kilowatt per meter input compared to comparable chain conveyors, ensuring energy efficiency without compromising performance.

Chief Commercial Enclosed Belt (CCEB): Maximizing Capacity, Simplifying Maintenance

The CCEB, or Chief Commercial Enclosed Belt, sets a new standard in belt conveyor technology. Featuring three independent idlers, this design maximizes the cross-sectional area for increased capacity while operating at a low speed. Maintenance becomes a breeze with easily removable independent idlers from the outside of the conveyor frame. Notably, the absence of brackets or bearings exposed to the internal atmosphere of the conveyor housing enhances longevity and reliability.

Chief Spool Enclosed Belt (CSEB): Troughed Support, Effortless Maintenance

Chief Agri's Chief Spool Enclosed Belt (CSEB) introduces a spool-shaped idler that provides a troughed support for the conveyor belt. This innovative design incorporates two externally isolated bearings, allowing easy access through the side of the conveyor for routine maintenance. Unlike traditional methods, routine maintenance can be conducted with no damage or need to cut the belt, saving time and resources.

Mark Kjar, Chief Agri's President, expressed enthusiasm about the launch, stating, "Our new Belt Conveyor product line showcases Chief Agri's commitment to providing efficient and reliable solutions for the agriculture and grain handling industry. With the CCEB and CSEB, we are confident in delivering unmatched performance, increased capacity, and simplified maintenance to our customers."
