## Press Release

08 February 2019

Bimba, an industry-leading innovator of pneumatic, hydraulic, electric and vacuum motion control, will discuss and demonstrate its solutions specifically designed and developed for food safety and packaging during the International Production & Processing Expo (IPPE), February 12-14, at Atlanta's Georgia World Congress Center (booth #8346).

Bimba's constantly advancing technologies will be represented by the numerous enhancements the Company has made to its full pneumatic line of products. Actuators, valves and vacuum products designed to enhance safety and convenience for food packagers and processors will be some of the many solutions on display at IPPE.

Highlights include:

- A display of Pneumatic wash-down cylinders demonstrating their ability to resist corrosion and eliminate contaminant catch points
- T-Bots, linear robots customized for packaging applications
- Universal Robots featuring Bimba vacuum end of arm tools (EOATs)
- Vacuum pumps and cups ideal for picking up and moving eggs, meat, and other food items for production, processing and packaging

Visit **booth #8346** or [www.bimba.com](http://www.bimba.com) for more information.

### About Bimba

Bimba is part of IMI Precision Engineering. Bimba is a forward-thinking innovator providing industry-leading pneumatic, hydraulic, electric and vacuum motion solutions that are easy to use, reliable and ready for all engineering solutions. Bimba markets an extensive line of industry-leading products including pneumatic, hydraulic, and electric actuators; valves; fittings; vacuum products; air preparation and a variety of safety and production solutions. In addition to its broad line of standard catalog products, the company's business develops many custom and semi-custom products designed for specific customers and applications. These products, used in machinery and automation, are sold to original equipment manufacturers and end-users throughout the world in an expanding variety of industries.

## Press Release

IMI Precision Engineering is a world leader in motion and fluid control technologies. IMI Precision Engineering's reputation rests on a world-class portfolio of high performance products, the innovation and technical expertise of its 6000 people, and an ability to deliver exceptional local service. A subsidiary of the £1.75 billion turnover engineering group IMI plc, IMI Precision Engineering has a sales and service network in 75 countries, technical centers in the USA, Germany, UK and China, and manufacturing facilities around the world.

### **About IMI plc**

IMI plc, the specialist engineering company, designs, manufactures and services highly engineered products that control the precise movement of fluids. Its innovative technologies, built around valves and actuators, enable vital processes to operate safely, cleanly, efficiently and cost effectively. The Group works with industrial customers across a range of high growth sectors, including energy, transportation and infrastructure, all of which are benefiting from the impact of long-term global trends including climate change, urbanization, resource scarcity and an ageing population. IMI employs around 11,000 people, has manufacturing facilities in more than 20 countries and operates a global service network. The Company is listed on the London Stock Exchange. Further information is available at [www.imiplc.com](http://www.imiplc.com).
