

Press Release

Biochem Strengthens Operations in South America with New Office in Sao Paulo, Brazil

In a bid to further strengthen their position in the South American market, Biochem has recently announced the opening of a new branch office in Sao Paulo, Brazil. This family owned and operated manufacturer of feed additives for animal nutrition currently operates in more than sixty countries in different corners of the globe.

Lohne, September 2018. Biochem is pleased to reveal that the company has recently opened an office in Sao Paulo, Brazil with the goal of catering better service to the company's rapidly expanding market in South America. Headquartered in Lohne, Germany, the company has carved a niche in the global animal nutrition market with their top-rated supplements and feed additives for pigs, poultry, ruminants, and companion animals. Biochem currently operates in sixty-plus countries around the world, with more than two hundred fifty employees.

"It is a matter of great pleasure for us to announce that our new office in Sao Paulo, Brazil is now fully operational. In the recent months, we have completed all the necessary staffing to ensure seamless functioning of our growing business in the South American market," said Dr. Alexander Grafe from Biochem. "Led by a highly capable management team, we are confident about building a robust presence throughout South America."

In the initial phase, Biochem is offering their popular products E.C.O.Trace® and ProbioTrace in the Brazilian market. However, numerous Biochem products including B.I.O.Key®, TechnoSpore, TechnoZyme, Bimulac® Pre, ProbioSacc 2G, TechnoMos®, TechnoYeast®, Lactiferm® Fe; B.I.O.Acid, and B.I.O.Mould® will be available very soon in Brazil. The company has already teamed up with VetLine Feed Solutions to function as Biochem's distribution partner in Brazil.

The supplements and feed additives from Biochem are available in powder as well as liquid, paste, and water-soluble form. The company's additive concepts are focused around the profitability and sustainability of the livestock farmers while improving the intestinal health and nutrient utilization for the animals. The farm concepts derived by Biochem has significantly served the animal husbandry sector by successfully addressing multiple challenges faced by the industry.

Biochem leverages the latest scientific developments in its field to deliver world-class products that help the livestock owners and veterinarians deal with the most critical challenges related to animal health and nutrition. Over the last three decades, the company has been engaged in scientific research in association with several globally acclaimed institutes. Biochem's product range includes probiotics and probiotics, organic trace minerals, enzymes, toxin binders, emulsifiers, acids, betaine products, and colostrum powder.

In pursuit of becoming a potent force in the South American market, Biochem recently started operations in Brazil, Ecuador, Argentina and Uruguay, and the new office in Sao Paulo is a part of this expansion process. Monica Florez, based in Germany, serves as the company's Regional Technical Manager for South America. Sources reveal that Paulo Ricardo Lima de Oliveira is Biochem's Regional Sales Director based in Brazil.

About Biochem:

Based in Lohne (Germany), Biochem is a family-owned company that develops and markets feed additives for animal nutrition. In keeping with the slogan „Feed Safety for Food Safety®“ and in compliance with GMP+, QS, DIN EN ISO 9001, DIN ISO 50001, and HACCP standards, Biochem produces high-quality supplements and feed additives in powder form along with water-soluble products, pastes, and liquids for pigs, poultry, ruminants, and horses. 4FEED!® stands for innovative feed additives that focus on dietary aspects to support gut health and increase nutrient utilization. Biochem farm concepts also support veterinarians and livestock farmers in maintaining and improving animal health. Continuous scientific research together with independent, internationally-recognized institutes is a top priority for the German company. For more than 30 years this has resulted in innovative and effective products and concepts within the triad of ecology, economy, and food safety. With more than 250 employees, Biochem is present with branch operations and a distribution network in over 60 countries worldwide.

Основанная в Лоне (Германия), компания Biochem - семейная компания, которая разрабатывает и продает кормовые добавки для кормления животных. Придерживаясь слогана «Безопасный корм для здорового питания» и в соответствии со стандартами GMP +, QS, DIN EN ISO 9001, DIN ISO 50001 и HACCP Биохем производит высококачественные добавки и кормовые препараты в виде порошков, водорастворимых продуктов, паст и жидкостей для свиней, птицы, жвачных животных и лошадей. 4FEED!® - это инновационные кормовые добавки, которые сфокусированы на поддержании здоровья кишечника и увеличении использования питательных веществ. Готовые концепции для фермеров от Биохем помогают ветеринарам и животноводом поддерживать и улучшать здоровье животных. Непрерывные научные исследования в независимых, признанных во всем мире институтах всегда были и остаются первоочередной задачей для немецкой компании. За более чем 30 лет это привело к появлению инновационных и эффективных препаратов и концепций, соответствующим основным трем принципам, а именно экологии, экономике и безопасности пищевых продуктов. Насчитывая более 250 сотрудников, Биохем работает с филиалами и дистрибьюторами в более чем 60 странах мира.

Biochem Zusatzstoffe Handels- und Produktionsgesellschaft mbH mit Sitz in Lohne (Deutschland) entwickelt und vertreibt als Familienunternehmen Futtermittel-Additive für den Bereich Tierernährung. Unter dem Motto „Feed Safety for Food Safety®“ produziert Biochem gemäß GMP+, QS, DIN EN ISO 9001, DIN ISO 50001 und HACCP hochwertige Zusatzstoffe und Futterzusätze in Pulverform sowie wasserlösliche Produkte, Pasten und Flüssigkeiten für Schweine, Geflügel, Wiederkäuer und Pferde. 4FEED!® beinhaltet innovative Futteradditive, bei denen diätische Aspekte zur Unterstützung der Darmgesundheit und Steigerung der Nährstoffausnutzung im Vordergrund stehen. Mit den Produkten der Farmkonzepte unterstützt Biochem darüber hinaus Tierärzte und Tierhalter bei der Erhaltung und Unterstützung der Tiergesundheit. Höchste Priorität liegt für das deutsche Unternehmen auf der steten wissenschaftlichen Forschung gemeinsam mit unabhängigen, international anerkannten Instituten. So entstehen innovative und effektive Produkte und Konzepte im Dreiklang von Ökologie, Ökonomie und Lebensmittelsicherheit – und das seit mehr als 30 Jahren. Das Unternehmen ist weltweit in über 60 Ländern mit einem eigenen Filial- und Distributionsnetz sowie mehr als 250 Mitarbeitern vertreten.
