**Specialty Feed Additive Experts Brookside Agra to Showcase its
All-Natural, Antibiotic-Free Products at
International Production & Processing Expo. (IPPE)**

(O'Fallon, IL, Jan. 29, 2019) - One of the country's leading authorities on all-natural, antibiotic-free specialty feed additives and animal health and environmental products, O'Fallon, IL-based Brookside Agra, will be featuring several of its innovative products at the International Production & Processing Expo. (IPPE), Feb. 12-14, 2019 in Atlanta, GA. Be sure to stop by **Booth #A1029** at the Georgia World Congress Center to talk to Brookside's experts about *Absorb Plus™*, *Advanced Bio Pro™*, *Ammocure™*, *Yucca Liquid/Powder/Meal*, *Calf Rescue™*, *FloBond™*, *GP Pro+™* and *Runt Rescue™*.

[Absorb Plus](#)

Absorb Plus is an all-natural, multi-purpose drying agent that provides sustained suppression and elimination of ammonia, moisture and odors in animal production and housing facilities. All of Absorb Plus's separate components are on the GRAS (Generally Recognized As Safe) and FDA lists. Absorb Plus is ideal for swine and poultry housing, calf units, dairy loafing houses, animal bedding, dog kennels, livestock trucks and trailers and horse stables.

[Advanced Bio Pro](#)

Advanced Bio Pro is an innovative, natural proprietary liquid blend of stable, highly active microbial cultures, enhancers and nutrients specifically selected to naturally and safely eliminate odors associated with ammonia, amines, hydrogen sulfide and mercaptans. Advanced Bio Pro is research-proven to remove 95% of odors within three days; reduce composting time by up to 50%; eliminate fruit fly and

mosquito larvae; prevent growth of algae in fountains, ponds and lakes; and eradicate fats, oils and greases.

Ammocure Yucca Liquid/Powder/Meal

Ammocure Yucca Liquid/Powder/Meal is a specially formulated, all-natural source of saponin derived from the Yucca Schidigera plant for addition to animal feeds to control animal waste volume and odor. Ammocure comes in various forms and concentrations to meet all customer applications. Available in liquid, powder and meal formulations.

Calf Rescue

All-natural Calf-Rescue is an oral nutritional supplement for dairy and beef calves. When given as directed, Calf-Rescue gel provides select vitamins and a stabilized source of direct-fed microbials (probiotics) to maintain a healthy, natural appetite, digestion and immune system during the critical newborn periods and times of stress.

FloBond

FloBond is a research-proven, all-natural binder and anti-caking agent that permanently deactivates deadly mycotoxins that live in animal feeds and grains. Mycotoxins, the result of mold and fungi growth, can be detrimental to the performance of poultry, livestock, fish and pets. Mycotoxins occur in most grains (corn, wheat, oats, soybeans, sorghum, cottonseed, rye and rice) and can cause cancer, liver and kidney problems, infertility, growth rate reduction and other problems that affect animal profitability.

GP Pro+

GP Pro+ is a high-quality nutritional protein supplement that can improve pig, poultry and pet health. It contains key nutrients including highly digestible sources of peptides, amino acids and trace minerals, which use less of the animal's energy to digest. When incorporated into a balanced diet, GP Pro+ drives feed intake leading to optimal growth, condition and health.

Runt Rescue

Given right after birth to weak, cold piglets less than 2.5 lbs., liquid Runt-Rescue helps to reduce mortality in large litters, prevents weak piglets from starving and provides small piglets with the energy boost they need to find and secure a teat for suckling. The new formulation contains hyper-immunized, egg-powder-containing, egg-based antibodies derived from hens strategically vaccinated over time with specific antigens.

For more information about Absorb Plus, Ammocure, Calf Rescue, FloBond, GP Pro+ and Runt Rescue, contact Tim Nelson, Vice President - Animal Health & Nutrition Sales, at 402-560-7381 or tim.nelson@brookside-agra.com. For information about Advanced Bio Pro, contact Tony Arro, Director of Sales - Specialty Products, at 618-628-8300 ext. 24 or tony.arro@brookside-agra.com.

About Brookside Agra

Brookside Agra is a global fifth-generation, family-owned business based in O'Fallon, IL that manufactures and distributes a variety of research-proven, natural products for specialty feeds; animal health and production; agriculture; and commercial, industrial and environmental use. Brookside also offers agronomy services, which include crop nutrient recommendations, soil sampling, water and fertilizer analysis, and precision mapping, among other services.
