#### PRESS RELEASE

Craemer presents load carrier with particularly stable construction

## **Extremely Durable: The SB3 Pallet Box**

**Plastic pallet boxes are the ideal solution for storing and transporting products and bulk goods of all kinds – provided the containers are robust, stackable, easy to transport and easy to clean. The SB3 pallet box from Craemer meets these requirements and more. Its single-mould production and a particularly stable construction also make it extremely durable.**

The Craemer pallet box SB3 is made of high-quality, food-safe polyethylene and is available in industrial dimensions (1,200 x 1,000 millimetres). The 790 millimetres high container has a capacity of 610 litres and a payload of 1,543 pounds. The SB3 is optionally available in a closed or perforated version, with three runners or nine feet. Depending on the version, it weighs 39 or 42.5 kilograms.

### **Numerous advantages in daily use**

Thanks to its ingenious design, the one-piece, injection moulded SB3 offers numerous advantages in day-to-day use. The particularly stable runner or foot connection ensures extreme resistance and, with the former version, secure lift-tilt emptying by a rotating forklift. Additional ribs on the outer walls provide increased impact protection against forklift tines, while the all-round stacking level in the upper and lower edge make the container compatible with a large number of other containers. The seamless construction and the smooth inner surfaces enable easy emptying, easy cleaning and good drying properties. The vents of the perforated version are chamfered on the inside to protect sensitive goods. The SB3 is temperature-resistant from -22°F and 104°F, briefly up to 194°F.

### **Optional equipment**

The SB3 pallet box from Craemer is optionally available with two closed or open drain ports. The integrated 1-inch or 2-inch thread and a drilling mark make it easier to open the holes later if necessary. Two transponder brackets enable retrofitting with RFID tags, and printing fields offer space for an individual logo, lettering or numbering. The SB3 is rounded off by a custom-fit lid, which is available as additional equipment.

### **Craemer Group at IPPE**

The Craemer Group with headquarters in Germany is one of the world's leading manufacturers of durable logistics solutions and boasts over 60 years of experience in plastics processing. The portfolio includes plastic pallets for a wide variety of requirements and a wide range of transport and storage containers, from stacking boxes, round containers and tubs to pallet boxes. All Craemer products feature tried and tested quality and are made from high-quality polyethylene that meets the strictest requirements. Craemer will be presenting its SB3 and other pallet box models at IPPE (January 24 - 26, 2023) in Atlanta in hall BC, booth BC9951.
