

**FOR IMMEDIATE RELEASE**

**COP CONTAMINATION TERMINATOR**

*COP Parts Washers from Douglas Machines Corp. Helps Eliminate Contamination & Debris*

**Clearwater, FL, February 4, 2019** – The Food Industry continues fighting the battle to eliminate debris, soil, contamination, mold and bacteria from equipment, tools and parts. Douglas Machines Corp. builds a line of [COP Parts Washers](#) that helps take the effort and worry out of cleaning crucial components. Money, energy, labor and time are saved while increasing productivity.

***Douglas COP-48 Parts Washer will be on display at Booth #B4000***

Designed to clean all types of irregular shaped parts, fittings, valves, tubes, nozzles and tools in a recirculating wash tank that provides continuous turbulent jet action. Ideal for cleaning irregular pieces or difficult to reach surfaces that are hard to access with conventional spray patterns or manual washing.

Sales Manager Kevin Quinn explained, “Our COP Parts Washers as well as our line of washers for containers and trays are in demand because of the versatility to adapt to the customers’ needs. Quinn stated, “The Food Industry is striving to stay one step ahead of food safety regulations and recalls.

Noting the power of knowledge, “For 40 years we’ve been working closely with various industry processors and manufacturers to deliver expertise in food safety and sanitation. We are a trusted partner that delivers productivity, profits and results.”

**Standard COP Washer Features**

Rugged #12 Gauge Stainless-Steel Construction	High Efficiency Motor
Steam or Electric Maintenance Heating	Side and End Jets
Automated Temperature Control	Adjustable Cycle Times
Tri-Clover Clamps for Ease of Cleaning	4’, 6’, 8- or 10’ sizes (custom available)
