

Press Release

Enzyme Innovation Launches Multienzyme Blend - DigeGrain Delta A Mega Bucks Saver

DigeGrain Delta – A Multi Enzyme Blend

Enzyme Innovation launched **DigeGrain Delta** – A multienzyme complex for poultry and pigs. Following are the benefits of DigeGrain Delta:

- saves up to US\$ 0.3 / bird or US\$ 1.0 / piglet
- blend of 5 enzymes including phytase. Hence reduces inventory handling cost
- pellet temperature stable product
- can be used on broilers, layers and piglets
- can reduce use of antibiotic growth promoters
- reduced environmental pollution

DigeGrain Delta is available with animal trials done at Kangwon University, South Korea and Ghent University, Belgium.

Our additional products:

Products	Enzyme Type	Benefits
Poultry & Swine		
DigeGrain X	Xylanase	get up to 100 Kcal ME and 0.5% CP, increase bird weight up to 10% with corn, soybean meal & wheat diet
DigeGrain Pro	Protease	save up to 1% of CP or US\$ 3 / ton of feed with corn soybean meal diet
DigeGrain M	Mannanase	get up to 100 Kcal ME and 0.5% CP, increase bird weight up to 10% with corn, soybean meal diet
DigePhos 10G	Phytase	new generation phytase to reduce DCP
Ruminants		
Liquicell AF	Cellulase complex	Improve digestibility of silage, improve nutritional value and increase ME level
BoviSEB	Enzymes, probiotics & bio enhancers	improve milk yield by 10% – 25% and fat content by 10%-20%
Aquaculture		
AquaSEB	Enzymes, probiotics & bio enhancers	control algal bloom and maintain healthy pond hygiene
Aquatrenz	Enzymes, probiotics & bio enhancers	Increase weight gain up to 5-20% in aquaculture
Farm Waste Management		
EnviroSEB Series	Enzymes, probiotics & bio enhancers	converts waste from animal farms into value added products

Enzyme Innovation also offers enzymes like alpha galactosidase, amylase, beta glucanase, cellulase, lipase etc. Company also provides dossiers for product registration. Team of nutritionists is on board for trials and consultation on enzyme use and diet reformulation.

About Enzyme Innovation

Enzyme Innovation is a subsidiary of Specialty Enzymes and Biotechnologies, USA focused on marketing and business development of animal feed, food and industrial enzymes in Americas. Enzyme Innovation is accredited with ISO, KOSHER, HALAL, GMP, GMP+ certifications and specializes in offering non GMO enzymes & customized solutions. The group is established in year 1986 in Chino, California and is leading fermenter of enzymes globally.

From year 2015, Enzyme Innovation started offering solutions to animal feed industry in American market. Solutions are offered for poultry, pigs, ruminants and are backed up by animal studies. Company does offer individual enzymes and customized solutions for animal farm waste management.

Visit us at booth **#C105 at IPPE, 2017, Atlanta** to check details.
