

## Press Release

# Enzyme Innovation Inc. Launches Novel Probiotic BioSEB BC – *Bacillus coagulans*

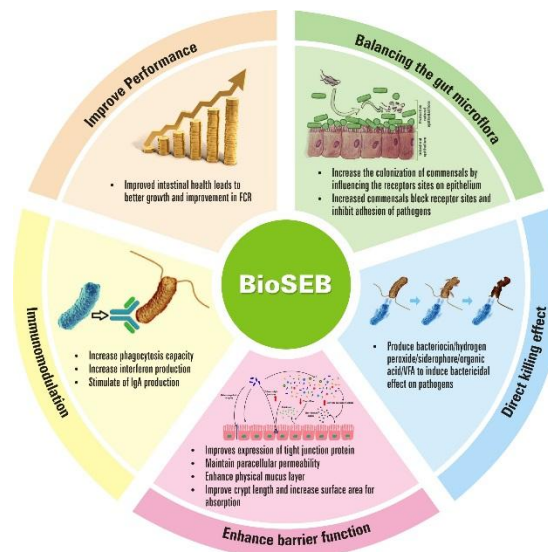

Enzyme Innovation Inc. launches novel probiotic **BioSEB BC – *Bacillus coagulans*** for use in animal feed industry.

Following are the features & benefits of BioSEB BC:

### **Benefits**

Following are the benefits of BioSEB BC:

- efficiently inhibit the growth of pathogenic microbes
- reduce or replace AGP use
- stimulates immunity and improves disease resistance
- improves intestinal microbial balance
- nullifies effects of enterotoxins & helps in quicker detoxification of mycotoxins, , thus making animals less vulnerable to diseases
- significantly help lowering of chick mortality, improves egg production and quality, fertility and hatchability of eggs, egg albumen quality and reduces yolk cholesterol concentration
- improves absorption of nutrients, increases feed digestibility and thus FCR
- reduces ammonia in faecal contents
- strengthens skeletal system of birds and reduces carcass contamination
- reduces skatole formation in pigs

### Features

- Spore forming & thermostable
- Stability to palletization temperature
- Low acid pH stable
- Resistant to bile salt & pepsin
- Compatible with antibiotics and coccidiostats
- Soluble & stable in water, hence can be dosed through water line
- Secretion of bactericidal substance
- Organic grade availability

### Our additional products:

Products	Enzyme Type	Benefits
<b>Poultry &amp; Swine</b>		
DigeGrain Delta DigeGrain Advance	Multi enzyme blend	Save upto US\$ 0.3/bird or US\$ 1.0/piglet, suitable for corn soya diet
DigeGrain X	Xylanase	get up to 100 Kcal ME and 0.5% CP, increase bird weight up to 10% with corn, soybean meal & wheat diet
DigeGrain Pro	Protease	save up to 1% of CP or US\$ 3 / ton of feed with corn soybean meal diet
DigeGrain M	Mannanase	get up to 100 Kcal ME and 0.5% CP, increase bird weight up to 10% with corn, soybean meal diet
DigePhos 10G	Phytase	new generation phytase to reduce DCP
<b>Ruminants</b>		
Liquicell AF	Cellulase complex	Improve digestibility of silage, improve nutritional value and increase ME level
BoviSEB	Enzymes, probiotics & bio enhancers	improve milk yield by 10% – 25% and fat content by 10%-20%
Aquaculture		
AquaSEB	Enzymes, probiotics & bio enhancers	control algal bloom and maintain healthy pond hygiene
Aquatrenz	Enzymes, probiotics & bio enhancers	Increase weight gain up to 5-20% in aquaculture
<b>Farm Waste Management</b>		
EnviroSEB Series	Enzymes, probiotics & bio enhancers	converts waste from animal farms into value added products

Enzyme Innovation also offers enzymes like alpha galactosidase, amylase, beta glucanase, cellulase, lipase etc. Company also provides dossiers for product registration. Team of nutritionists is on board for trials and consultation on enzyme use and diet reformulation.

### **About Enzyme Innovation**

Enzyme Innovation is a subsidiary of Specialty Enzymes and Biotechnologies, USA focused on marketing and business development of animal feed, food and industrial enzymes in Americas. Enzyme Innovation is accredited with ISO, KOSHER, HALAL, GMP, GMP+ certifications and specializes in offering non GMO enzymes & customized solutions. The group is established in year 1986 in Chino, California and is leading fermenter of enzymes globally.

From year 2015, Enzyme Innovation started offering solutions to animal feed industry in American market. Solutions are offered for poultry, pigs, ruminants and are backed up by animal studies. Company does offer individual enzymes and customized solutions for animal farm waste management.

Visit us at booth **#A449 at IPPE, 2019, Atlanta** to check details.
