

Lenexa, KS – Did you know? In 2006, Mike Simmons purchased the Express Scale Parts to fulfill a passion to invest in a manufacturing business where he could work with creative minds to provide ESP's customers with equipment to meet their needs and effectively reduce costs while continuing to increase their overall productivity.

His vision for ESP was clear. Build capacity and dissolve the differences, to iron out the inequalities (pause) to design and manufacture the best, most dependable bagging systems in the industry.

“Part of our success at ESP is due to the reliability of our products. We build them tough, we build them to last. That eliminates down time for our customers. It gives them better product flow with consistent accuracy on our scales.”

One of our most popular product is the JM Series Gross Weigh Bagging Scales. These are great for handling free flowing dusty products at 8-9 bags per minute. Also, the bagger's gravity gate comes with adjustable flow control allowing you to get within 2-3 ounces of your target weight.

About Express Scale Parts

A true pioneer in the packaging industry since 1978, Express Scale Parts, Inc has produced bagging systems, conveyors, palletizers and other packaging equipment that are now used in all 50 states and over 55 countries worldwide. Our customers have come to expect durability and consistency from our products along with unmatched customer and technical service. Our business goal is simple; we strive to meet these expectations for another 38 years and beyond.

You can trust our entire staff with over 180 years of experience to complete your order correctly, on time, and with the utmost integrity and professionalism. Or as we like to call it....."THE RIGHT WEIGH®".
