

FORNAZOR
INTERNATIONAL, INC.

HALAL CERTIFIED 100% VEGETABLE PROTEIN

Hillsdale, New Jersey --- Fornazor International, a 40-year-old agricultural commodity trading company, has received Halal certification from Islamic Services of America for Super Pro Plus feed. This market segment offers major potential in growth and global value.

What is SUPER PRO PLUS? It's an all-Natural, 100% vegetable, super protein.

Super Pro Plus, Fornazor's 100% Vegetable Protein Concentrate, is formulated for intended use in layer, breeder and broiler rations. SPP is a dense energy concentration, with highly digestible protein (Protein minimum 62.0%) and an ideal amino acid profile, giving the concentrate many of the same attributes of animal proteins, *without* any added animal protein sources.

Halal, which translates to "permissible" and refers to a set of rules in Islam dictating permissible and forbidden activities, often involves food. Traceability is key in greater assurance of halal integrity, from feed to fork.

The company will be targeting customers in Southeast Asia, the Middle East, India, and Africa. Customers include large poultry farms as well as distributors.
