

ISA Corporation is a North-America-based, multinational company focused on bringing high standards of quality and performance to the polymer industry. We have state-of-the-art production and fabrication facilities, combined with over 100 years of combined experience, knowledge and expertise in producing premier products. At ISA Corporation, our manufacturing facilities are located in modern industrial areas and our facilities are tightly controlled. All products are chlorinated prior to inspecting and packaging is monitored closely so as to eliminate the possibility of contamination. Superior, safe and reliable products for your most important personal protection equipment needs is our top priority.

Showcasing in our booth this year will be our **Flatfoot** Disposable Shoe Covers that are widely used throughout the meat and cheese processing industry and are excellent for contamination control.
