

JAX INC Announces Reformulation of its Green-Clean Cleaner/Degreaser

January 2023

Menomonee Falls, Wisc.

JAX INC., an industry leader in specialty lubricants, announces the reformulation of its Green-Clean industrial cleaner and degreaser.

The cleaner underwent changes to its formulation to be more environmentally friendly.

JAX Green-Clean boasts several eco-friendly benefits. It is non-toxic, biodegradable, and free from additives like dyes, fragrances, alkalis, acids, ammonia, butyl esters, and chlorine bleach. It is VOC compliant and safe for use around humans, pets, and the environment. The formula is pH neutral for easier disposal in sewers. It is NSF A1 registered.

"Reformulating this solution was imperative," says Erika Gayhart, marketing manager at JAX. "Our customers need a cleaning solution that removes greases, oils, and stains effectively. They also need to be sure that what they use isn't harming the environment. We are proud to offer a solution that performs well and is more eco-friendly than before."

To meet its customer needs, JAX's product development team carefully evaluated different materials and their chemistries for effectiveness and biodegradability. "One of the major changes we made to the formulation was removing the solvent," says JAX chemist Aaron Ramirez. "Petroleum-based solvents are harsher on the surfaces, the environment, and people. We have replaced that with an emulsifier surfactant package that essentially lifts the soil off the surface so it can be washed or wiped away. In our initial field trials, we show high performance compared to other biodegradable solutions available on the market. We are confident our customers will be quite satisfied with its effectiveness."

The Green-Clean Cleaner/Degreaser is available as a concentrated solution, which may be diluted for different cleaning applications. It is also available in multiple formats, including a spray bottle, for convenience.

Its applications include:

- Cleaning surfaces in and around food processing areas (not direct contact)
- Ultrasonic cleaning machines and ultrasonic cleaners
- Food, hospitality, and beverage equipment
- Cleaning parts after machining

Customers can find the reformulated Green-Clean at a hand-selected network of U.S. and global distributors who are ready to assist commercial operators in selecting the lubrication products and programs that best suit their operation. To find local distributors, customers are encouraged to contact the JAX customer service team at info@jax.com or by calling 800.782.8850.

ABOUT JAX INC.

JAX INC. is a US-based industrial lubricant manufacturer with expertise formulating high-performance synthetic lubricants, fleet and heavy-duty lubricants, industrial lubricants, biodegradable lubricants and food-grade lubricants. Since 1955, JAX has earned a worldwide reputation as a leader in emergent lubrication technology, helping organizations realize

operational cost savings through extended equipment life, reduced downtime, and increased productivity.
