## **J&D Manufacturing to release new Light Trap Combination at the 2018 IPPE**

EAU CLAIRE, WI – November 10, 2017 – *J&D Manufacturing is excited to announce its newest addition to its family of poultry products – the black Light Trap Combination.*

The Light Trap Combination is a system of products working together to keep light out of a poultry barn while allowing for maximum ventilation. The Combination includes the light trap, transition, shutter and fan. Current fan sizes are 36" and 55". J&D's light trap and transition are sized extra-large to reduce airflow restriction. With less restriction, the fan is able to move the air it was designed to move and keep birds cooler.

The complete Light Trap Combination (light trap, transition, shutter, and fan) has been tested in an AMCA certified lab. The certified CFM at 0.10" SP is 27,773. J&D has completely removed the guesswork, and you can be confident about the airflow your birds will receive. A consumer can treat this system as they would any other exhaust fan with reliable AMCA or BESS Lab data.

Other notable features include hinged light trap doors. This allows for quick access to transition and fan, making maintenance and cleaning more efficient. It's the only combination system that mounts flush to the inside wall. The ledge free light trap eliminates roosting locations for cage free applications and drastically reduces obstructions inside the facility. The entire combination is also high pressure washing safe for convenience.

To see this impressive combination first hand, visit J&D Manufacturing's booth at the 2018 IPPE in Atlanta, GA, booth B3911.

J&D Manufacturing, Inc. is a quality manufacturer and international distributor of ventilation and equipment products for agriculture, horticulture, industrial and commercial applications. J&D brings together competitive price, unmatched quality and total system solutions. J&D values its commitments to their customers and their worldwide dealer network. Their professional team of ventilation specialists and engineers are dedicated to new technology and the manufacturing of energy-efficient and safe products that are built to last. J&D has been delivering quality products at competitive prices for over 35 years. Log on to [www.jdmfg.com](http://www.jdmfg.com) for more information.
