KML offers Sanitary Bearing Solutions in the New 2019 Corrosion Resistant Products Catalog

Pottstown, PA – January 4, 2019 – KML Bearing USA announces availability of the 2019 Corrosion Resistant Products Catalog announcing new Clean-in-Place bearing technologies for Food Service/Sanitary applications. This entirely new publication provides Food Processors and OEM's with solutions for difficult washdown applications. This completely revised edition contains these new product features & benefits:

- Sanitary Design Stainless Steel Stand-Out Mounted Bearing Units improve cleanability.
- Poly Guard IP69K Bearing Cap & Seal Kits for increased bearing life in washdown applications.
- 440C Stainless Steel Radial Ball Bearings for corrosion resistance in food processing applications.
- K-Poly™ H-1 Lube-for-Life Solid Polymer Lubricants eliminate over lubrication headaches.
- Triple-Lip Black Oxide Insert Bearings provide additional protection in high debris areas.

KML Bearing USA will be in Hall B, Booth 5764 at the 2019 International Production & Processing Expo.

About KML Bearing USA

Offering 40+ years of bearing development and fabrication expertise, KML Bearing USA can provide the best possible combination of Washdown Rated Corrosion Resistant Bearing Products for most applications. With substantial inventory-availability coupled with reliable supply chain logistics, all KML Food Service Application Products offer Tier One Features and Benefits at competitive prices. KML Corrosion Resistant Products also provide cost reductions for OEM, MRO and end-user alike.
