KML Bearing USA provides Lube-for-Life Solutions for Corrosion Resistant Applications

Pottstown, PA – January 4, 2019 – KML K-Poly™ Solid Lubricant is a Micro-porous Polymer that eliminates the need for additional lubrication providing a true Lube-for-Life bearing solution. K-Poly™ is formulated with high performance synthetic lubricating oils, extreme pressure additives and corrosion inhibitors. The newest Perfluorinated Formula is effective in caustic extreme washdown applications. The K-Poly™ micro structure releases the oil as the bearing warms to operating temperature. The oil is reabsorbed after the bearing stops operation, eliminating weeping and unwanted dripping. KML K-Poly™ is specially formulated with an NSF registered H-1 grade synthetic oil in Food Service and Sanitary applications.

KML Bearing USA will be in Hall B, Booth 5764 at the 2019 International Production & Processing Expo.

About KML Bearing USA

Offering 40+ years of bearing development and fabrication expertise, KML Bearing USA can provide the best possible combination of Washdown Rated Corrosion Resistant Bearing Products for most applications. With substantial inventory-availability coupled with reliable supply chain logistics, all KML Food Service Application Products offer Tier One Features and Benefits at competitive prices. KML Corrosion Resistant Products also provide cost reductions for OEM, MRO and end-user alike.
