## KML Stainless Steel Stand-Out Bearing Housings provide Clean-in-Place benefits

**Pottstown, PA** – January 1, 2019 – KML Bearing USA announces availability of sanitary design Stainless Steel Stand-Out Bearing Units. This new design incorporates Clean-in-Place features that make cleaning and sanitizing easier. Edge seams that hold moisture are eliminated. Mounting points are self-draining. Stand out posts create a ½" access channel for cleaning and move the bearing assembly away from food contact areas.

These products are available now in 2-bolt stand-out, 3-bolt offset stand-out, 4-bolt stand-out and tap base stand-out Stainless Steel Corrosion Resistant mounted bearing units. Front cap and rear seals are available for all part types.

KML Bearing USA will be in Hall B, Booth 5764 at the 2019 International Production & Processing Expo.

### About KML Bearing USA

Offering 40+ years of bearing development and fabrication expertise, KML Bearing USA can provide the best possible combination of Washdown Rated Corrosion Resistant Bearing Products for most applications. With substantial inventory-availability coupled with reliable supply chain logistics, all KML Food Service Application Products offer Tier One Features and Benefits at competitive prices. KML Corrosion Resistant Products also provide cost reductions for OEM, MRO and end-user alike.
