# PRESS RELEASE

## Ledwell & Son Celebrates 70 Years

November 22, 2016

Since 1946, Ledwell & Son Enterprises has been building quality equipment to make our customers' lives easier. Ledwell has become a leader in trailer and truck body manufacturing over the past seventy years.

Continuing the tradition of innovation, Ledwell designs quality custom feed equipment with the owner and operator in mind. Our goal is to improve productivity and reduce overall cost of ownership. Ledwell Feed Trucks and Trailers are designed to overcome service obstacles through improved efficiency, safety, performance and durability.

We provide quality features to enhance operations. Ledwell trailers have the lowest center of gravity in the industry to reduce roll-over occurrences, as well as, full function wireless controls for safety and efficiency. Our Drag Chain delivery prevents feed deterioration, while our Paddle Wagon delivery incorporates higher volume delivery with fewer fines than any other delivery system on the market. Ledwell's Vacuum Reclamation System is the best quality and value on the market – providing a valuable tool to reclaim and redistribute feed.

We stand behind every piece of Ledwell equipment on the road today. Whether it be in the Rental, Construction, Transportation, Energy, Vacuum or Feed industry, our goal is to keep the operator running. Ledwell delivers service after the sale by providing a comprehensive parts inventory, together with a responsive Service and Warranty department.

Ledwell is dedicated to quality and dedicated to you.
