FOR IMMEDIATE RELEASE

Nilfisk HPW – High Pressure Washers Announces Participation at IPPE 2019

Fort Pierce, Florida – November 12, 2018. [Nilfisk HPW](#) is a leading manufacturer of professional pressure washer equipment, announces its participation at the International Production & Processing Expo ([IPPE](#)), February 12-14, 2019 at the Georgia World Congress Center in Atlanta, GA.

Exhibiting this year at booth #B8607, [Nilfisk HPW](#) will be showcasing an expansive product portfolio found within each of their brands of high pressure washers by [Nilfisk](#) and [Hydro Tek](#). With over several decades of cleaning expertise, they develop and manufacture high quality products that represent the latest technology and innovation in the pressure washer industry.

Whether the need is for cleaning and sanitizing equipment in all segments of the feed, meat and poultry industry, an outdoor surface with stubborn grime, or a semi-professional or industrial job, they have the machines you need for projects both big and small. Choose from any one of their machines to assist with tackling the most rigorous of cleaning jobs to bring back the shine.

Product spotlights include:

- [MH 4M](#) is ideal for all hot water commercial and industrial cleaning tasks. Equipped with EcoPower™ boiler, it offers ideal and best in class efficient performance level for general hot water cleaning. The MH series has an EcoMode option which adjusts the boiler to its most efficient setting for cleaning protein rich material such as blood or animal waste.
- [MC 5M](#) mid-range cold water pressure washers are the most versatile partners for demanding customers in agriculture, industrial, construction and automotive applications.
- [SM Series](#) are compact, portable, gas powered, diesel heated hot water pressure washers that have stainless steel coil housing, panels and burner cover for durability against the harshest environments.

Nilfisk HPW – High Pressure Washers experts will be available in booth # B8607 to consult and discuss needs for specific industry applications.
