

Nutec Manufacturing
2018 IPPE Booth Preview

Headline: 100% Electric – 0% Oil

Copy: Nutec Manufacturing will be exhibiting their 745E and 760E Forming Systems at the IPPE Show – Booth #B5615. These totally electric systems use absolutely no hydraulic oil or compressed air. This makes for a more hygienic process. Though completely electric, they use approximately 50% less electricity than other machines their size, while forming food at a faster pace. A smaller footprint also makes them better choices for food and meat processing operations.

See both Food Forming Systems at Booth #B5615.
