

Phytobiotics announces participation at IPPE 2017

Eltville, Germany, 2017-13-01 – The company Phytobiotics, producer and vendor of well-known feed additives including phytogenic supplements, flavors, organically bound trace elements, and products for commercial biogas production will again be represented at this year's 2017 International Production and Processing Expo in Atlanta, GA.

"Phytobiotics is excited to announce that Sangrovit® **Stat Pak 125** is now available in the US Market as a water-soluble solution, and **Sangrovit® 54** is available as a feed based solution. Since last year's IPPE the US team has been growing, We're expanding our team in the US, to lead in brining practical, economical solutions to the US Poultry Market" explains Mr. Bruce King, Managing Partner of Phytobiotics North America LLC. In 2016 Phytobiotics conducted several trials, both on farm level and at universities to confirm the proven effects under US production conditions. These great results will be presented at this year's IPPE.

Our much-anticipated phytogenic feed additives, **Sangrovit® G Premix** and **Sangrovit® 54** (for use in broilers) has shown to increase overall production profitability. With the changing trends in poultry production along with the increasing demand for safer, higher quality products, there is no better time than now to strengthen our presence within the US marketplace," explains Dr. Hermann Roth, founder and CEO of Phytobiotics. "We feel strongly that our products will demonstrate significant beneficial effects not only in feed consumption, but also in overall production costs."

Phytobiotics, along with their partner companies, make up one of the fastest growing global companies serving the animal industry. In addition to feed additive products, Phytobiotics also provides consultative services focused on intestinal health, stress reduction, and increased nutrient bioavailability for a wide array of animal species. Phytobiotics also supplies the bioenergy industry with technology and fermentation stimulants at both the farm and industry level throughout Europe and Asia. Global headquarters for Phytobiotics are located outside Frankfurt, Germany in the town of Eltville.
