

PolyConversions, Inc. – News Release

December 2017

PolyConversions' USA made Protective Wear Saves On “Donning and Doffing”

PolyCo gowns are engineered for quick and easy “donning and doffing”. VR[®](vinyl replacement) Multi-Use Gowns and PolyWear[®] Single-Use Gowns have been designed to replace traditional Aprons and Sleeves. With more extensive coverage of the employee, PolyCo Gowns have demonstrated to provide greater protection for both the employee and the product. In addition to improving employee productivity by saving on garment changes, the elimination and replacement of aprons and sleeves can contribute to the reduction of inventory costs. PolyCo’s innovative vinyl free and disposable poly apparel products are challenging traditional protective materials/designs in processing facilities worldwide.

Come visit us in **Booth #B4630 @ the 2018 International Production & Processing Expo in Atlanta** or for further information contact Scott Carlson
