QST LIQUID SMOKE PLANT OPENS IN TENNESSEE – USA!

QST Smoke Products LLC a Tennessee company and division of QST Ingredients and Packaging, Inc. announced that they have completed their first phase of construction at their Cookeville, TN Smoke Flavors Plant. QST’s Smoke Flavors Plant has the capabilities to match all of the top liquid smoke applications, including drenching, atomization, direct addition, brine addition, Browner’s, oils and also offers several dry powder smoke products. QST has brought together a top-notch group of smoke products experts. From plant engineering, construction and operations, to product development, application and sales support. For more information and to request smoke product samples please email SmokeFlavorinfo@qsting.com

QST President and CEO Chris Topps says “the smoke products and flavors industry will finally have a small privately held company whose focus is on the customer, delivering Quality and Service while building Trust.”
