

Holac Dicers from Reiser

See live demonstrations of all our equipment at IPPE 2017, Booth B5845

Holac is a world leader in dicing technology and offers a complete range of Dicers for applications of all types and sizes. All Holac equipment is designed for easy sanitation and total hygiene. Holac Dicers provide unmatched versatility and easily produce a variety of uniform product shapes and sizes. Featuring a simple-to-change cutting grid, a single Holac can cube, strip, shred or flake all types of products and improve yields with consistent size pieces ranging from 1/8" to 2-1/4". Holac offers a wide range of equipment to satisfy any production requirement, from stand-alone machines to fully-automated lines.

The key to the Holac is its versatility. Because it is so quick and easy to change the cutting grid, you can easily make a wide variety of products. With a Holac Dicer, processors can use the same raw materials they currently process to expand their product line. Use the Holac to produce cubes for kebabs and stews; strips for fajitas and stir fry; juliennes, shreds and flakes for salad and pizza toppings.

And for processors looking at a dedicated line, the automation, high performance and product uniformity of a Holac Dicer gives it a clear edge.

Holac Cubixx Series

Holac Cubixx Dicers are a range of universal, multi-purpose machines that offer tremendous flexibility and are perfect for smaller applications. They produce cubes, slices, flakes, and strips from meat, poultry and seafood. Choose the Cubixx Dicer that best fits your application – from compact, manual load machines, to semi-automatic machines with discharge conveyors, to fully-automatic machines equipped with automated infeed, loading and discharge. The maximum production output of Cubixx Dicers ranges from 2,500 lbs. to 10,000 lbs. per hour, depending on Cubixx model and product.

Holac Maxx Series

Holac Maxx Dicers are ideal for use in semi-automatic or fully-automatic production lines. The Maxx 116 U handles pre-formed product. The multi-purpose Maxx 116 LP handles all types of loose product. The Maxx 150 LP is optimized to work with frozen products in loose or block form. The 150 LP can also handle fresh product. Maxx Dicers are available with an infeed conveyor or integrated lift/tilt device, and a discharge conveyor for high levels of production. The maximum production output of Maxx Dicers range from 5,000 lbs. to 7,000 lbs. per hour, depending on Maxx model and product.

Holac AUT 30

The flexible AUT 30 is high-performance, multi-purpose dicer that features a multi-functional infeed and is suited for larger applications. Product can be loaded by hand, or with an integrated lift/tilt device, or via conveyor belts. The AUT 30 processes both loose and pre-formed products and blocks. It can output up to 6,000 lbs. per hour.

Holac HA

The Holac HA series of dicers are semi-automatic, multi-purpose machines designed for high-volume applications. The HA 30 handles pre-formed products, while the HA 125 can process loose or pre-formed products. The HA can output up to 6,000 lbs. per hour.

Holac VA

The Holac VA series of dicers are fully automatic, multi-purpose machines designed for the highest production requirements. Product is loaded with an integrated lift/tilt device or via conveyor belts. The VA's large hopper and large magazine allow maximum output. The VA 125 is ideal for loose product and processes up to 6,000 lbs. per hour. The VA 150 N is ideal for loose product and processes up to 10,000 lbs. per hour. The VA 150 G is optimized to process frozen products in loose or block form and can output up to 6,000 lbs. per hour.
