

Rice Lake Showcases In-Motion Solutions at IPPE

Rice Lake, Wis.—Rice Lake Weighing Systems will demonstrate checkweighing and metal detection solutions at the International Production & Processing Expo, January 31 - February 2, 2018 at the Georgia World Congress Center in Atlanta. Rice Lake's MotoWeigh® in-motion weighing systems will be showcased in addition to industry-leading metal detection systems.

Visitors to booth C963 will experience hands-on demonstrations of Rice Lake's MotoWeigh in-motion weighing systems—offering a broad selection of features and options to maximize efficiency and safety. The MotoWeigh also features the ability to create up to four lanes of checkweighing operation with bar code verification or reject systems.

Also displayed at IPPE, MotoWeigh metal detection systems deliver critical sensitivity for commercial food processing lines by detecting ferrous, non-ferrous and stainless steel contaminants. With a food-grade, stainless steel washdown design, MotoWeigh models can be quickly disassembled with modular variable-speed belting that removes easily for cleaning and sanitation.

Learn more about these and other in-motion solutions at booth C963 or visit www.ricelake.com.

Rice Lake Weighing Systems is a family-owned, ISO 9001 certified corporation, and has been manufacturing and distributing weight-related products and supplies since 1946. Today, Rice Lake Weighing Systems is a global leader in measurement and weight-based solutions.
