

## **Rice Lake Weighing Systems Will Feature Industrial Weighing Solutions for the Meat and Feed Production Industries at IPPE 2018**

Rice Lake, Wis.—At the Georgia World Congress Center in Atlanta on January 30-February 1, Rice Lake Weighing Systems will be exhibiting a complete line of weighing equipment at International Production and Processing Expo (IPPE) 2018. Booth 963, Hall C will feature commercial-grade weighing and processing equipment designed for meat and feed production plants. Washdown equipment, metal detection systems, hanging scales and checkweighers will be on hand, as will the 1280 Enterprise™ digital weight indicator.

Products such as the CW-90X over/under checkweigher and RoughDeck® QC-X present unique industry solutions for processing environments that adhere to strict hygiene and pathogen control practices. Made to help meet HACCP requirements, the CW-90X bench checkweigher is IP69K rated to withstand rigorous handling and high pressure washdowns. The hermetically sealed load cells and breathable yet watertight indicator enclosure allows the CW-90X to function accurately without condensation or water damage. Constructed of 304 stainless steel, the RoughDeck QC-X washdown floor scale is designed according to the American Meat Institute's (AMI) Sanitary Design Principles (SDP), with its top plate capable of opening to reveal a completely washable interior. Also demonstrated at IPPE 2018 will be the MotoWeigh® Metal Detection System that ensures product safety and quality by detecting ferrous, non-ferrous and stainless steel contaminants with critical sensitivity.

Visitors to booth 963 will be able to see demonstrations where the 482 Legend Series™ and 1280 Enterprise™ digital weight indicators are connected to Rice Lake's weighing equipment for industry-leading process control and communication. Rice Lake experts will be on hand to answer questions about instrumentation products and their task performance in every type of industry.

Also present at IPPE 2018 will be the Rice Lake TS Series tuning fork balance for rapid, repetitive weighments. This mono metal IP65 rated tuning fork has the ability to interface with a PC for recording and data sharing, and it offers 13 different units of measurement. Rice Lake's Versa-portion® compact food scale is Legal for Trade, IP68 protected and suited for cramped spaces with a platter size of 9.3 x 7.8 inches. Equipped with a stainless steel finish and removable weigh platter for HACCP compliance, the portable Versa-portion bench scale will work for up to 60 hours when powered by a rechargeable battery.
