### **Shoe Inn: Making Putting Shoe Covers on Faster, Easier, Safer and Cleaner**

Shoe Inn automatic shoe cover dispensers and shoe covers help companies save time and money by eliminating time wasted when manually applying ordinary shoe covers. They substantially increase efficiency and productivity, help prevent contamination, and reduce workplace injuries. “Shoe Inn’s ergonomically-friendly dispensers are an innovative and cost effective solution for safety and cleanliness in environments that need to meet high standards like ISO 14644-1 and Federal Standard 209E, HACCP, and GMPs,” says Jeff Foster, Global Product Manager for the company.

The [Shoe Inn Stay automatic shoe cover dispenser](#) is designed for medium to high-volume usage in a wide variety of environments, including food manufacturing and processing. It is non-electric, so it can be easily deployed at any suitable location. The ABS plastic and stainless steel machine, which holds up to 220 disposable shoe covers in two cartridges, is quickly loaded in bulk, which makes it simple to maintain in higher volume applications. It comes with an adjustable loading feature to make it easy to load any of Shoe Inn’s eight types of disposable shoe covers. The built-in handlebar is an added safety measure that helps eliminate the “bootie hop” or, as Foster calls it, a “worker’s comp claim waiting to happen.”

“With the Shoe Inn Stay, companies benefit from ease of use, time savings, which translates to increased profitability at the bottom line, and added safety,” said Foster.

#### **About Shoe Inn**

For over 10 years, Shoe Inn’s industry leading automatic shoe cover dispensers and removers have been making putting shoe covers on and taking them off faster, easier, safer and cleaner. Shoe Inn’s pioneering dispensers and a wide variety of shoe covers are used by hundreds of companies and organizations spanning small businesses to Fortune 500 companies world wide in industries ranging from food manufacturing and processing to pharmaceuticals, biotechnology to energy, aerospace to medical devices, and everything in between. Even our military uses the Shoe Inn system. Shoe Inn also carries a range of related products, including sticky mats, disposable gloves, and other personal protective equipment from today’s leading manufacturers.
