

Essity to Exhibit Tork Washstation Dispenser at IPPE 2018
Tork brand's industry-leading hygiene and sanitation tools on display at IPPE

ATLANTA, January 17, 2018 – The Tork brand, made by Essity (formerly SCA), will be exhibiting at the 2018 International Product & Processing Expo (IPPE) from January 30th to February 1st, featuring the Tork® Washstation Dispenser. Tork® Washstation Dispensers are HACCP International Certified and are engineered with stainless steel parts, one of the highest refill capacities on the markets, and a durable water-resistant design for optimal performance in the wet and harsh conditions of production and processing.

Maryellen Anastasio, Marketing Manager, Professional Hygiene, Essity will be on-site to discuss the importance and benefits of using high quality cleaning tools.

“Safety and sanitation are held to a very high standard in the production and processing of the food we eat. Innovative technologies, like the Tork Washstation Dispenser, ensure manufacturing facilities are appropriately equipped to prevent and mitigate the risk of food contamination,” says Anastasio.

IPPE is the world's largest annual display of technology, supplies, and services used in the production and processing of eggs, meat, and poultry, and those involved in feed manufacturing. Mitigating risk and maximizing operational efficiency is a crucial for these industries—not only as a part of meeting strict cleaning and HACCP protocols, but a part of achieving business goals.
