

PRESS RELEASE

For Immediate Release: October 4, 2017

Triangle to feature Model XY-RJ VFFS bagger with rotatable sealing jaw, zipper applicator at IPPE

Change package formats in minutes

CHICAGO – For food packagers looking to improve production and switch package formats in just minutes, Triangle’s Model XY-RJ offers an easily rotatable sealing jaw. The vertical form fill seal (vffs) bagger can run pillow bags, gusseted bags, 3-sided bags, and stand-up pouches (SUP), all on the same machine.

Key features and benefits include:

- Flexibility to run a variety of bags with quick and simple changeover;
- Easy-to-rotate sealing jaw requires no heavy equipment or complicated tools – switch formats in 15 minutes or less;
- Ability to easily run supported (laminated) or non-supported film with tool-less interchangeable back seal;
- Continuous zipper application with optional Longitudinal Zipper Applicator;
- Optional Ultrasonic Sealing;
- Bagging speeds up to 120 bpm.

Users enjoy such benefits as flexibility, ease of maintenance, improved production, and Triangle service and support. In addition, Triangle vffs baggers offer superior sanitation, and can meet USDA and 3A sanitation standards. Technically advanced and operator friendly, the new bagging machine also features a tool-less, easy to change back seal. Thanks to its ability to run a wide variety of package styles, it is ideal for numerous markets, including meat, poultry, seafood, IQF products, pasta, produce, confectionery, and snacks.

PRESS RELEASE

In addition, Model XYRJ offers optional Ultrasonic sealing for both cross seal and back seal. Users who add the option of Ultrasonic sealing can see additional benefits, such as airtight package seals, increased product throughput, and virtually eliminated leakers and rejects. Ultrasonic welding technology is ideal for leafy produce, cheese, confectionery, and other industries that require 100% seal integrity for an airtight product.

Triangle's X-Series VFFS Baggers not only offer the flexibility to seal bags with heat sealing or Ultrasonic welding, they also feature quick changeover of forming tubes, film rolls and sealing jaws, allowing users to run supported or unsupported film and multiple bag sizes and speeds. Standard features on the Triangle X-Series include Rockwell Automation / Allen Bradley ControlLogix, AB Kinetics Servo Drives, and AB PowerFlex AC Drives.

Triangle will be exhibiting Model XY-RJ VFFS Bagger with zipper applicator at the International Production and Processing Expo (IPPE), January 30 – February 1, 2018. Visit us in Booth B-3935, or online at www.trianglepackage.com, to learn how we can help you improve production and product quality.

About Triangle

Triangle Package Machinery is a U.S. manufacturer of vertical form fill seal (VFFS) bag machines, combination weighers, horizontal cartoning / bag-in-box systems, and tray loading / depositing systems. Founded in 1923, Triangle is headquartered in Chicago, IL, and offers a 120,000 sq ft facility that houses its entire manufacturing process from raw material fabrication through complete machine testing and checkout. Triangle also provides superior after sales support, training, documentation, and online troubleshooting, as well as spare parts service. For more information on Triangle's equipment and service capabilities, visit us online at www.trianglepackage.com, or call (800) 621-4170.
