

# Ultrasonic Poultry Systems Announces Egg & Manure Belt Welding System

GROVE CITY, OH (December 2017) – Ultrasonic Poultry Systems, recently announced the new P100 Poultry Egg & Manure Belt Welder. This belt welder will be demonstrated at IPPE: booth #1926 / Hall B.

Ultrasonic Poultry Systems has made poultry belt welders for years and is pleased to introduce their new rugged and easy to use system designed to withstand harsh environments better and make belt welding that much faster and easier.

## Key advantages:

- **Interchangeable Tips** – change in seconds and are made from Titanium for increased longevity.
- **Protected** – contained in a military grade Pelican™ crushproof case.
- **Corrosive airborne particulates** – cannot enter system.
- **Controlled Welds** – take less than 5 seconds.
- **Portable**
- **Warranty** – one year parts & labor.

The P100 System has been thoroughly tested to perform on all brands of belts and is remarkably easy to use. Welding systems comes complete with power supply, wrenches for tip changing, handgun, cable, and user manual in English and Spanish.

“We are pleased to bring this easy to use poultry belt welding system with the highest quality tips available to weld the widest variety of belt materials and thicknesses,” said Paul Spurgeon, Ultrasonic Poultry Systems.

## About Ultrasonic Poultry Systems.

Ultrasonic Poultry Systems is known globally for innovative and heavy-duty ultrasonic belt welding systems. Sales, service, and support to: USA, Mexico, South America, and Canada.
