

UNIBLOC®-PUMP

Dairy, Food, Meat and Beverage processing create a challenging environment for pumps and equipment. Reliability, performance and an ability to withstand daily sanitation are essential. Unibloc Pump develops a network of pumps and patented features specifically designed to withstand these challenges, offering a longer lasting, more cost-effective and easy-to-maintain pump. You will quickly recognize the low cost of ownership, low shear and gentle transition. MXD and X-ray detectable rotors are designed for food safety. Fewer components and customization drive all our pumps.

QuickStrip

QUICKSTRIP® MXD

The uniqueness of our pumps is seen in our latest technology breakthrough: Quickstrip® Rotors. These rotors are available in MXD—Metal and X-ray Detectable.

DuraCore® rotors offer the uncompromising strength of stainless steel combined with front and back wear pads for durability and affordability. PolyFlex® rotors are easy to remove and easy to clean. This advanced product technology has been the reliable standard for industries such as food and dairy processing for three decades.
