

## **URSCHEL RELEASES NEW AFFINITY INTEGRA® DICER TO MEET THE CHALLENGES OF DIFFICULT-TO-CUT PRODUCTS**

Urschel will display a variety of precision cutting machines at IPPE booth #4545 including the new Affinity Integra® Dicer. The Integra excels at processing challenging, difficult-to-cut applications such as cheese or soft meats, meats with high-fat content, cold temperature products, sticky bakery ingredients, or products like brined pickles. In addition to prevailing over challenging throughputs, the clean-cutting action achieves high yields of precise, targeted cut sizes well within customer parameters.

This new dicer incorporates design elements from the longstanding Model RA series, the Affinity, and the Sprint® with the ability to replace existing in-line Model RA series machines. Consider the Affinity Integra to enhance your production capabilities. Compared to our standard Model RA-HD machine, this new dicer accepts a larger infeed product size combined with a larger impeller case that equates to potentially a 20 percent increase in yield; when compared to our standard RA-A, it equates to potentially a 50 percent yield increase. Increases vary per product, and free-of-charge test cutting of your product is encouraged to quantify achieved capacities. In addition, the Integra also offers greater overall design efficiencies. Stop by the Urschel booth to learn more.

In addition to the new Integra, Urschel will display the rugged M6 Dicer. Ideally suited for cutting frozen-tempered, fresh-chilled, or hot-cooked beef, pork, or poultry, the M6 delivers a variety of shreds and dices.

Founded in 1910, Urschel remains the global leader in food cutting technology and continues to partner with food processors around the world to develop the latest in cutting machinery: Urschel, [www.urschel.com](http://www.urschel.com), toll-free 1-844-URSCHEL (877-2435), [info@urschel.com](mailto:info@urschel.com); [Video Affinity Integra Dicer](#).
