Veterinaria Digital

Happy IPPE 2018 from our company to yours!

Opportunity knocks on the livestock producer companies' doors!

From January 30th to February 2nd Hall B stand B 9059

Veterinary science website expends its unique characteristics in the United States and is honored to participate in International Production and Processing Expo.

www.veterinariadigital.com

Independent and international online platform of veterinary science is happy to invite you to its booth and share with you the knowledge and experience in animal pathology, actual problems in livestock sector, situation of animal health and production

Our public is veterinary professionals dedicated to animal nutrition and health, our team identifies with researchers, veterinarians, engineers, zoo technicians and producers committed to the defense of quality food production.

Getting started

The project was born in 2010 with the intention of providing clear and objective information on the veterinary world and has become a reference portal for information. The web presents a user-friendly and interactive platform that offers quality scientific information through articles, reports and news on the pork, sheep, cattle, poultry and aquaculture sector. Our website operates in four different languages: Spanish, Ingles, Russian and Chinese.

Our writing team and collaborates with the Royal Academy of Veterinary Sciences, the Iberoamerican Association of Mycology Specialists, the Peruvian Academy of Veterinary Sciences and the Veterinary Faculties of North Carolina (USA), Fujian (China), Southern Scientist (Peru) and University of Cordoba (European Union).
