

## 2027 IPPE Education Programs

### Paid Programs:

#### **International Poultry Scientific Forum**

Monday, Jan. 25, 7:30 a.m. – 5:00 p.m.

Tuesday, Jan. 26, 8:00 a.m. – 12:00 p.m.

**Registration Fee: \$95 early bird, \$155 after Jan. 8**

Sponsored by the Southern Poultry Science Society, the Southern Conference on Avian Diseases and the U.S. Poultry & Egg Association, the forum presents information on industry topics such as environmental management, nutrition, physiology, pathology, processing and products and avian diseases. Students with a valid student ID may register complimentary onsite. Price includes admission to the IPPE show floor.

#### **Latin American Poultry Summit**

Monday, Jan. 25, 8:30 a.m. – 6:30 p.m.

**Registration Fee: \$215 early bird, \$300 after Jan. 8**

The Latin American Poultry Summit will focus on leading technical topics covering live production and processing issues of greatest priority to Latin American poultry and egg producers and processors. The content focus will focus on a variety of areas for broilers and layers. The summit will bring together key researchers from universities and leaders from genetic companies, suppliers, integrators and commercial companies to learn, discuss and network. The summit includes complimentary coffee breaks, lunch, reception and interpretation.

#### **Foundations of Listeria monocytogenes Intervention and Control Workshop**

Monday, Jan. 25, 2:00 p.m. – 5:00 p.m.

Tuesday, Jan. 26, 8:00 a.m. – 12:00 p.m.

**Registration Fee: \$499**

Explore the basics of controlling Listeria monocytogenes in meat and poultry processing environments. This course covers key topics related to Listeria, including sanitation, facility design, sampling and environmental monitoring practices used to address the pathogen within processing facilities.

#### **Pet Food Conference**

Tuesday, Jan. 26, 7:30 a.m. – 4:00 p.m.

**Registration Fee: \$150 early bird, \$199 after Jan. 8**

As the only education program at IPPE dedicated exclusively to the pet food industry, the American Feed Industry Association's Pet Food Conference is where pet food professionals come to learn, connect and prepare for what's next. Gain practical strategies and timely insights into regulatory developments,

ingredient innovation, emerging issues, nutrition, manufacturing, product claims and marketing while networking with more than 500 professionals from across the pet food supply chain.

Whether you're developing new products, navigating evolving regulations, strengthening your business strategy or expanding your professional network, you'll leave with actionable knowledge and meaningful connections you can put to work.

Conference registration includes breakfast and lunch. Reserve your spot and add this must-attend event to your IPPE schedule today.

### **Foreign Material Control: From Reaction to Prevention**

Tuesday, Jan. 26, 8:00 a.m. – 12:00 p.m.

#### **Registration Fee: \$299**

This interactive workshop is designed to help food safety and quality professionals assess and strengthen their foreign material prevention programs.

### **Feed Mill of the Future Conference**

Tuesday, Jan. 26, 8:00 a.m. – 12:00 p.m.

#### **Registration Fee: \$95 early bird, \$125 after Jan. 8**

The half-day Feed Mill of the Future Conference brings together leading feed industry experts to examine emerging feed mill technologies and processes that will impact animal feed manufacturing in the years ahead — turning emerging feed technology into competitive advantage. Feed-milling professionals will leave with a better understanding of how innovation and early adoption will help achieve their productivity and profitability goals of tomorrow. The conference is presented by Feed & Grain magazine and Feed Strategy in partnership with the American Feed Industry Association.

### **Animal Food Industry & USDA APHIS Collaborative Effort in Import & Export**

Wednesday, Jan. 27, 8:00 a.m. – 4:00 p.m.

#### **Registration Fee: \$280 early bird, \$380 after Jan. 8**

Join several key government agencies, including staff from the U.S. Department of Agriculture, to learn about their impacts on trade (import/export) of animal food products. Network with government personnel that directly impact a company's ability to trade. Hear from industry regarding how changes at the USDA Animal and Plant Health Inspection Service (APHIS) affect continuity of business. Participants will learn about how policy is made and how the agencies support trade.

### **Poultry Nutrition Under Challenge: Linking Feed, Gut Health and Performance**

Wednesday, Jan. 27, 10:00 a.m. – 12:00 p.m.

#### **Registration Fee: \$79 early bird, \$99 after Jan. 8**

Poultry production continues to evolve but supporting gut health and optimizing productivity remain fundamental goals. The 2027 AFIA Animal Nutrition Program will bring experts to discuss the interactions among nutrition, health and performance in poultry production. Using common health challenges encountered in the field as examples, speakers will discuss how gut challenges affect nutrient requirements and utilization, and how nutritional strategies may help support bird resilience and minimize performance losses. The program will connect research findings with practical feeding applications, providing attendees with a better understanding of when and how nutritional interventions can complement health and feeding strategies in modern poultry production.

### **International Rendering Symposium**

Thursday, Jan. 28, 11:00 a.m. – 6:00 p.m.

**Registration Fee: \$250**

Rendering is an integral and often invisible aspect of animal agriculture's economic and environmental sustainability. This program, hosted by the North American Renderers Association and USPOULTRY, will discuss rendering's contributions, impact and the future of the industry.

## **Free Programs:**

### **AFIA Feed Education Program**

Wednesday, Jan. 27, 8:00 a.m. – 10:00 a.m.

**Registration Fee: FREE (included with trade show admission)**

Regulations are constantly changing – make sure your operation is prepared. The American Feed Industry Association's free Feed Education Program provides timely updates on the latest federal regulatory and compliance requirements impacting feed manufacturing. Hear directly from industry experts on evolving expectations from the U.S. Department of Labor, Environmental Protection Agency, Food and Drug Administration and Occupational Safety and Health Administration, while gaining practical strategies you can implement at your facility. Whether you're responsible for production, safety or regulatory compliance, this program delivers the knowledge and connections needed to stay ahead of industry changes.

### **Sanitation Essentials: Building the Foundation for Food Safety**

Wednesday, Jan. 27, 8:30 a.m. – 10:00 a.m.

**Registration Fee: FREE (included with trade show admission)**

Proper sanitation is the cornerstone of food safety in meat and poultry processing. This free educational session, hosted by the Meat Institute, provides a practical overview of sanitation fundamentals—perfect for those new to the industry or looking to reinforce their understanding of best practices.

Participants will learn the core principles of effective cleaning and sanitizing, the importance of sanitation in regulatory compliance and public health, and how a strong sanitation program supports product quality, worker safety, and operational success. Whether you're on the floor or in a support role, this session will help you better understand how sanitation contributes to a safe, efficient, and responsible food system.

### **From Disruption to Continuity: Strengthening Operational Resilience**

Wednesday, Jan. 27, 8:30 a.m. – 10:00 a.m.

**Registration Fee: FREE (included with trade show admission)**

As USDA Food Safety and Inspection Service expectations remain part of the operating environment for meat and poultry processors, organizations continue to balance food safety, product quality, inspection readiness, and rapid response to supply chain disruptions. From HACCP verification and Sanitation SOP documentation to recall procedures, supplier interruptions, and potential adulteration or misbranding events, organizations need greater visibility across their operations to protect business continuity and customer trust.

This session will explore how leading meat and poultry companies are building operational resilience through end-to-end traceability, real-time visibility, and integrated quality management. Drawing on industry best practices, attendees will learn how digital technologies and connected operational data can

help identify risks sooner, support HACCP and sanitation verification, strengthen recall readiness, improve supplier oversight, and enable faster, more confident decision-making across the value chain.

Participants will gain practical insights into creating a more agile and resilient operation capable of maintaining continuity during disruptions while meeting baseline expectations for inspected meat and poultry establishments. Whether responding to an agency inquiry, managing a supply shortage, documenting corrective actions, or executing a targeted recall, organizations that can quickly access accurate information and connect processes across production, quality, sanitation, inventory and supply chain functions are better positioned to reduce risk and protect profitability.

### **Extended Producer Responsibility 101 for Meat & Poultry: What It Is, Why It Matters and What to Do Now**

Wednesday, Jan. 27, 8:30 a.m. – 10:00 a.m.

#### **Registration Fee: FREE (included with trade show admission)**

Extended Producer Responsibility (EPR) for packaging has quickly moved from an emerging policy issue to a business reality for meat and poultry companies. As states implement new packaging EPR programs, processors are facing practical questions: Who is considered the “producer?” Which packaging is covered? What data must be collected and reported? How will fees be determined? And how could EPR affect packaging decisions, supplier relationships, food safety, operations and cost?

This introductory session will bring together three perspectives to help meat and poultry companies understand both the fundamentals of EPR and what implementation looks like in practice. Attendees will hear from an EPR implementation expert who will explain how these programs work and the evolving state landscape; a protein packaging expert who will address the unique challenges associated with meat and poultry packaging, including recyclability, product protection, food safety and packaging performance; and a meat processor who will share the practical realities of preparing for EPR within a complex organization.

Together, the speakers will move beyond the regulatory basics to identify the questions companies should be asking now—about their packaging portfolios, data, suppliers, internal responsibilities and future packaging decisions. Attendees will leave with a practical understanding of EPR, why it matters specifically to the meat and poultry industry, and steps their organizations can take now to prepare as implementation expands across the United States.

### **Animal Agriculture Sustainability Summit**

Tuesday, Jan. 26, 9:00 a.m. – 12:00 p.m.

#### **Registration Fee: FREE (included with trade show admission)**

An ever-increasing population coupled with a changing agricultural workforce has compelled the animal agriculture industry to make sustainability its top priority. Each animal agriculture sector has initiated an industry driven program to define sustainability and measure its commitment to become more sustainable. Representatives of the meat, poultry and animal feed industries will share details on the development of industry programs or tools to advance their aspirations of producing more protein in a sustainable fashion.

The U.S. Poultry & Egg Association, American Feed Industry Association and the Meat Institute will share details on opportunities for animal agriculture to advance food supply chain sustainability goals. In addition, the USPOULTRY Family Farm Environmental Excellence Award winners will be announced.

### **Poultry Market Intelligence Forum**

Wednesday, Jan. 27, 9:00 a.m. – 12:00 p.m.

#### **Registration Fee: FREE (included with trade show admission)**

A leading industry economist and industry experts will provide insights into how the domestic and global economies are continuously improving performance and how regulatory issues impact the poultry and egg industries. They will identify challenges facing the industry and discuss how the U.S. and International poultry industries are positioned to move forward.

### **Your Personal Board of Directors: Building a Network of Mentors, Sponsors & Advocates**

Wednesday, Jan. 27, 1:00 p.m. – 2:30 p.m.

#### **Registration Fee: FREE (included with trade show admission)**

No one builds a successful career alone. While having a mentor can provide valuable guidance, the most effective professional networks often include a diverse group of people who play different roles in your career journey—from mentors and sponsors to coaches, advocates, peers and connectors.

In this interactive session, participants will explore how to intentionally build their own “personal board of directors”—a network of trusted individuals who can provide perspective, challenge assumptions, open doors, advocate for opportunities and help navigate career transitions. Panelists will share real-world experiences about how these relationships developed, what made them effective and how they evolved over time.

Attendees will learn how to identify the types of relationships they need at different stages of their careers, find potential mentors and sponsors both inside and outside their organizations and move beyond simply making connections to developing meaningful, mutually beneficial relationships. Participants will leave with a clearer understanding of who is currently in their professional circle, who may be missing and how to intentionally build relationships that support both their immediate goals and long-term career growth.

### **Secure By Design: Intersection of OT and IT**

Wednesday, Jan. 27, 1:00 p.m. – 2:30 p.m.

#### **Registration Fee: FREE (included with trade show admission)**

As meat and poultry processors continue to connect production equipment, plant-floor controls, data systems and enterprise networks, cybersecurity is no longer only an information technology (IT) concern, it is a shared operational responsibility. This session will help explore how the convergence of operational technology and IT changes customer expectations, risk management and the design of connected processing solutions.

The session will translate cybersecurity concepts into practical actions suppliers can take before, during and after equipment deployment. Discussion will include secure remote access, software and firmware update practices, visibility into connected assets, segmentation between plant-floor systems and business networks, incident preparedness and the information processors increasingly need from suppliers to support resilient operations.

Attendees will leave with a clearer understanding of how supplier decisions can reduce cyber risk across the protein supply chain, support safer and more reliable operations and strengthen trust with customers as automation, AI-enabled systems and connected equipment become more central to processing environments.
