

C.R. Crawford Construction Showcases Comprehensive In-House Design-Build Capabilities

January 2024 - C.R. Crawford Construction is thrilled to announce its return as an exhibitor at IPPE. This year, the company is proud to showcase its expanded capabilities, made possible through strategic partnerships with Triton Design Builders, Jurni Design Group, and Prime Electric.

Building on its reputation as a leader in construction, C.R. Crawford Construction now offers comprehensive, in-house specialized solutions tailored specifically to clients in the food and beverage and manufacturing industries. The collaboration with Triton Design Builders, Jurni Design Group, and Prime Electric enhances the company's ability to provide end-to-end services, covering architectural and design, engineering, electrical, and construction.

"We are excited to take our capabilities to the next level with these valuable partnerships," said Mike Hill, project executive at C.R. Crawford Construction. "By bringing together the expertise of Triton Design Builders, Jurni Design Group, and Prime Electric, we can now offer clients a seamless and integrated approach to design and construction, all under one roof."

Attendees at IPPE are invited to visit C.R. Crawford Construction's booth, B40027, to explore the full spectrum of the company's design-build capabilities. Representatives from each phase of the process will be available to discuss how the expanded flock of partners can contribute to the success of projects in the food and beverage and manufacturing sectors.

"At booth B40027, our team of experts eagerly awaits the opportunity to collaborate and assist in growing your business," added Hill.

Don't miss the chance to connect with C.R. Crawford Construction and its partners at IPPE. Discover how the combined strengths of these industry leaders can bring innovation and efficiency to your next project.

About C.R. Crawford Construction

Founded in 2006, C.R. Crawford Construction is a relationship-driven company, providing expert solutions and execution in project planning, construction management, general contracting, and design-build services. We have focused expertise in the construction of hatcheries, processing and production, and food and beverage manufacturing facilities.
